Examples of Peer Reviews in the Area of Radioactive Waste Management Conducted by the IAEA

- Australia (2004), licence appliaction for the Australian near surface radioactive waste disposl facility
- Argentina (2012), Spent Fuel Dry Storage Project at Atucha I.
- Czech Republic (1993 and 2004), the deep geological repository development programme
- Finland (1994), to evaluate Finish nuclear waste management programme
- France (1996), the management of short lived waste in France
- Hungary (1999), selecting a site for Low and Intermediate Level Waste Disposal
- Lithuania (2006), programme for evaluating sites for near surface disposal of radioactive waste in Lithuania
- Lithuania (2011), disposal facility development programme for the near surface disposal of radioactive waste in Lithuania
- Malaysia (2011), Malaysian national low level radioactive waste repository: site selection study
- Malaysia (2011), Radiation Safety Aspects of a Proposed Rare Earths Processing Facility (the Lynas Project)
- Netherlands (2009), radioactive waste management activities of COVRA
- Norway (1995), establishing a combined storage/disposal facility for LILW
- Republic of Korea (2002), to review the R&D programme for the disposal of HLW in Korea
- Republic of Korea (2005), siting national near surface disposal facility
- Republic of Korea (2007), support to licensing national near surface disposal facility
- Republic of Korea (2012), the deep geologic disposal of high level radioactive waste from pyro-processing in Korea
- Romania (2007) to assess the current status of the development programme for a national repository for low- and intermediate-level waste
- Romania (200() to support ANDRAD near-surface repository development and licensing programme
- Slovakia (1994), to assess pre-operational safety report of Mochovce near surface repository
- Slovenia (2007), ARAO's documentation and technical programme for the development of the Slovenian national repository for low- and intermediate-level radioactive waste
- South Africa (2007), mobile hot cell operation
- UK (2008) The Decommissioning Programme of Magnox Limited, United Kingdom
- UK (2012) NDA Industry Guidance – Interim Storage of Higher Activity Waste Packages – Integrated Approach
- Ukraine (2012) review of the State Programme on "Remediation of the former uranium facilities of the Pridneprovsky Chemical Plant site"

- USA (1997), Performance Assessment of the US WIPP (jointly with OECD/NEA)
- USA (2001), the Total System Performance Assessment of the Yucca Mountain site (jointly with OECD/NEA)
