

TECDOC-981: Table of Contents

1. INTRODUCTION

- 1.1. Background
- 1.2. Objective
- 1.3. Scope
- 1.4. Structure

2. STEAM GENERATOR DESCRIPTIONS

- 2.1. PWR recirculating steam generators
- 2.2. CANDU recirculating steam generators
- 2.3. PWR once-through steam generators
- 2.4. WWER steam generators

3. STEAM GENERATOR DESIGN BASIS, FABRICATION AND MATERIALS

- 3.1. Codes and specifications
- 3.2. Fabrication and materials
 - 3.2.1. Heat exchanger tubes
 - 3.2.2. Tube installation in the tubesheet
 - 3.2.3. Tube supports
 - 3.2.4. Feedwater nozzle and shell

TECDOC-981: Table of Contents

4. STEAM GENERATOR DEGRADATION MECHANISMS

4.1. PWR and CANDU recirculating steam generator tubes

- 4.1.1. Primary water stress corrosion cracking (PWSCC)
- 4.1.2. Outside diameter stress corrosion cracking (ODSCC)
- 4.1.3. Fretting, wear and thinning
- 4.1.4. Pitting
- 4.1.5. Denting
- 4.1.6. High-cycle fatigue
- 4.1.7. Wastage

4.2. PWR once-through steam generator tubes

- 4.2.1. Erosion-corrosion
- 4.2.2. High-cycle fatigue
- 4.2.3. Low-temperature primary-side stress corrosion cracking
- 4.2.4. Outside diameter intergranular stress corrosion cracking (IGSCC) and intergranular attack (IGA)

4.3. WWER steam generator tubes

4.4. Tube rupture events

- 4.4.1. Tube ruptures
- 4.4.2. Incipient tube rupture events

4.5. PWR and CANDU steam generator shell, feedwater nozzle and tubesheet

- 4.5.1. Corrosion-fatigue
- 4.5.2. Transgranular stress corrosion cracking
- 4.5.3. High-cycle fatigue
- 4.5.4. Erosion-corrosion

4.6. WWER collector, shell, and feedwater distribution system

- 4.6.1. Stress corrosion cracking of the WWER-1000 collectors
- 4.6.2. Erosion-corrosion of the feedwater distribution system
- 4.6.3. Failure of collector cover bolts

4.7. Summary of current world experience

TECDOC-981: Table of Contents

- 5. STEAM GENERATOR AGEING MANAGEMENT: OPERATIONAL GUIDELINES**
 - 5.1. Primary coolant system water chemistry control parameters
 - 5.2. Secondary coolant system water chemistry control parameters
 - 5.3. Measures to control secondary-side chemical impurity incursions
 - 5.4. Measures to remove secondary-side impurities
 - 5.5. Measures to control steam generator deposits

- 6. STEAM GENERATOR INSPECTION AND MONITORING REQUIREMENTS AND TECHNOLOGIES**
 - 6.1. Tubing inspection requirements
 - 6.1.1~11. Tubing inspection requirements in the MS
 - 6.1.12. EPRI tubing inspection recommendations
 - 6.2. Tubing inspection techniques
 - 6.2.1. Eddy current testing
 - 6.2.2. Ultrasonic and other inspection methods
 - 6.2.3. Destructive testing
 - 6.3. Monitoring leakage from tubing
 - 6.4. Feedwater nozzle inspection
 - 6.5. Monitoring fatigue damage to feedwater nozzles

TECDOC-981: Table of Contents

7. STEAM GENERATOR ASSESSMENT METHODS AND FITNESS FOR SERVICE GUIDELINES

7.1. Tubing repair criteria

7.1.1. Generic fitness-for-service criteria

7.1.2. Defect type and location specific repair criteria

7.2. Tubing fitness-for-service guidelines in various countries

7.2.1. Regulatory practices and fitness-for-service guidelines in the USA

7.2.2. Alternative US fitness-for-service guidelines for outside diameter IGSCC/IGA at tube support plates

7.2.3. Alternative US fitness-for-service guidelines for PWSCC in the roll transition region proposed by EPRI

7.2.4. Other alternative fitness-for-service guidelines in the USA

7.2.5~15. Regulatory practices and fitness-for-service guidelines in the MS

7.2.15. Fitness-for-service guidelines in Switzerland

7.3. Statistical methods for degradation growth assessment

7.4. Use of probabilistic fracture mechanics analysis to assess steam generator ageing

TECDOC-981: Table of Contents

8. STEAM GENERATOR MAINTENANCE: MITIGATION, REPAIR AND REPLACEMENT

- 8.1. Primary-side mitigation techniques for tubes
 - 8.1.1. Rotopeening and shot peening
 - 8.1.2. Stress relieving
 - 8.1.3. Reducing the hot-leg side temperature

- 8.2. Secondary-side mitigation techniques for tubes
- 8.3. Tube repair
 - 8.3.1. Plugging
 - 8.3.2. Sleeving
 - 8.3.3. Nickel plating
- 8.4. Vibration control
 - 8.4.1. Preheater repairs
 - 8.4.2. Antivibration bar replacement
- 8.5. Mitigation of the thermal fatigue of the feedwater nozzles and piping
- 8.6. Repair of feedwater nozzles and piping
- 8.7. Steam generator replacement
 - 8.7.1. PWR replacement steam generator designs
 - 8.7.2. CANDU replacement designs
 - 8.7.3. WWER replacement designs

9. STEAM GENERATOR AGEING MANAGEMENT PROGRAMME

- 9.1. Understanding steam generator ageing and feedback of operating experience ...
- 9.2. Definition of steam generator AMP
- 9.3. Steam generator operation
- 9.4. Inspection, monitoring and assessment
 - 9.4.1. Inspection and monitoring
 - 9.4.2. Assessment
- 9.5. Maintenance: mitigation, repair and replacement
