Perspectives on **SAFETY, SECURITY & VERIFICATION**

7 THE CHANGING NATURE OF SAFEGUARDS

“Changes in structure and practices of the Safeguards Department have been accompanied by a change in culture that is more of a revolution than evolution.”

Richard Hooper takes stock of steps to strengthen the IAEA's verification system.

12 REDUCING THE THREAT OF "RDDs"

“More thinking and work are still required to develop an integrated, layered and cooperative defense system for radioactive source security.”

Charles Ferguson puts "dirty bomb" and other scenarios into perspective.

STAFF REPORT:

GLOBAL CALL FOR STRONGER CONTROLS

17 PROTECTING THE SOURCE: Securing Nuclear Material & Strong Radiation Sources

Fritz Steinhausler and George Bunn urge more action to close the gaps.

COMMENTARY

4 TIME FOR REFORM

“Reliance on a system of collective security to curb the proliferation of WMD will require bold thinking, a willingness to work together, and sustained effort.”

Mohamed ElBaradei calls for new concerted approach against weapons of mass destruction.

**STAFF REPORT: GLOBAL
REGIME FOR NUCLEAR
ARMS CONTROL**

**21 TRACES OF EVIDENCE:
Nuclear Forensics &
Illicit Trafficking**

“Law enforcement services in many States are now able to establish to what extent seized nuclear material might constitute an occupational hazard or public threat.”

Lothar Koch reviews the tools and methods of nuclear detective work.

**24 DECOMMISSIONING:
LESSONS TO LEARN**

John McKeown details lessons to learn for shutting down nuclear plants safely and effectively.

30 NUCLEAR LAW

Carl Stoiber surveys needs for legislative assistance in nuclear fields.

STAFF REPORT:
NEW IAEA HANDBOOK
ON NUCLEAR LAW

33 WATER FOR CITIES

“...a habitant of Kibera, the largest slum in Nairobi and Africa, earning less than a dollar a day, pays as much as five times the price paid by an average US citizen for a litre of water.”

Anna Kajumulo Tibaijuka offers insights and initiatives on Africa’s water needs and problems.

PROJECT PROFILE:
GREAT LAKES BENEATH THEIR FEET

**37 SUBTERRANEAN BLUE:
Sustaining Water Lifelines for Cities**

John Chilton explains why groundwater is the key for the world's big cities.

STAFF REPORT:
A GROWING THIRST FOR SOLUTIONS

41 TROUBLED WATERS: The Future of the Oceans

“Humans unwittingly alter ocean chemistry.”

A.D. McIntyre assesses the human impact on oceans and the consequences.

PROJECT PROFILES:
SHELL SHOCK: ALGAL BLOOMS
TAPPING OCEAN WATER

47 SEEDS OF LIFE: How wastelands become fertile fields

Bill Wallin and Jorge Morales highlight how countries are applying nuclear techniques in biosaline agriculture.

PROJECT PROFILES:
PAKISTAN: FROM THE SALT OF THE EARTH
SYRIA'S SALTWATER CREWS

“The farmers smile, especially for barley.”

Dr. Khalaf Haji Khleifeh, a scientist at Syria's Atomic Energy Commission, on the results from biosaline agriculture.

54 ALLEVIATING HIDDEN HUNGER

“More than two billion people suffer from anemia or iron deficiency which the World Health Organisation cites as the most widespread nutritional disorder in the world.”

Eileen Kennedy, Venkatesh Mannar and Venkatesh Iyengar track vital links between nutrition and health.

PROJECT PROFILES:
CUBA'S NUTRITION MISSION
A GOOD START: IAEA CONTRIBUTES TO SAFE MOTHERHOOD

62 NEW HORIZONS IN RADIO-PHARMACEUTICALS

Stephen Mather reviews technical developments shaping nuclear medicine's future.

66 ACCESS THE AGENCY
