

CONTENTS

1. INTRODUCTION	1
2. SCOPE AND OBJECTIVES	2
3. GENERAL STATEMENTS	2
3.1. France	2
3.1.1 Background	2
3.1.2. Ongoing sodium cooled fast reactor R&D.....	3
3.2. Germany	4
3.3. India.....	4
3.3.1 Fast breeder test reactor	4
3.3.2 Prototype fast breeder reactor	5
3.3.3. Knowledge preservation	5
3.4. Japan.....	6
3.5. United States of America	6
4. SESSION SUMMARIES	7
4.1. Session 1: Sodium cooled fast reactor operational experience.....	7
4.2. Session 2: Sodium cooled fast reactor decommissioning experience	7
4.3. Session 3: Fast reactor physics and engineering experiments and analysis	8
4.4. Session 4: Sodium cooled fast reactor knowledge preservation.....	8

SESSION 1: FAST REACTOR OPERATIONAL EXPERIENCE

Fast breeder test reactor. 15 years of operating experience	15
<i>K.V. Suresh Kumar, R.P. Kapoor, P.V. Ramalingam, B. Rajendran, G. Srinivasan, K.V. Kasiviswanathan</i>	
Operational experience and upgrading program of the experimental fast reactor JOYO.....	29
<i>T. Aoyama, T. Odo, S. Suzuki, S. Yogo</i>	
Operational experience of BN-350	63
<i>I. Dumchev</i>	
Lifetime extension of the Phénix nuclear power plant.....	83
<i>L. Martin, D. Pepe, R. Dupraz</i>	
Advanced and innovative approaches to inspect the Phénix fast breeder reactor	93
<i>M. Giraud, P. Major, J. Gros, L. Martin, Ph. Benoist, O. Burat</i>	

Sodium cleaning in Phénix steam generator modules.....	99
<i>O. Gastaldi, V. Grabon, Ch. Cavagna</i>	
Review of fast reactor operation experience gained in the Russian Federation. Approaches to the co-ordinated research project	107
<i>V.M. Poplavsky, Yu.M. Ashurko, Yu.E. Bagdassarov, A.V. Karpov, M.P. Nikulin, A.M Tsiboulia, N.N. Oshkanov, A.I. Kiryushin, B.A. Vasilyev, K.L. Suknev, A.S. Korol'kov, V.V. Denisov</i>	

SESSION 2: FAST REACTOR DECOMMISSIONING EXPERIENCE

Decommissioning experience from the experimental breeder reactor-II.....	137
<i>S.P. Henslee, K.E. Rosenberg</i>	
Sodium removal & decontamination process and decommissioning considerations for the PFBR components	141
<i>M. Rajan, C.S. Surendran, V. Ganesan, B.S. Sodhi, S.C. Chetal, R.D. Kale, R. Indira, A.K. Bhaduri</i>	
Overview of Tacis project K1.01/98A ‘Assistance to the elaboration of a decommissioning plan’ for Aktau BN-350 NPP (Kazakhstan).....	151
<i>R. Brachi</i>	
General review of the decommissioning of liquid metal fast reactors (LMRs) in France.....	159
<i>G. Rodriguez, R. Frith, M. Berte</i>	
Overall strategy of Creys Malville power station dismantling	185
<i>P. Alphonse</i>	
Disposal of Creys Malville sodium	187
<i>P. Alphonse</i>	
Superphénix — Strategy and orientations for dismantling the reactor block	191
<i>D. Chairot</i>	
Dismantling strategy for secondary loops and associated sodium circuits	203
<i>E. Joulia</i>	
Concept for dismantling the reactor vessel and the biological shield of the compact sodium cooled nuclear reactor facility (KNK)	209
<i>I. Hillebrand, W. Pfeifer</i>	
Experimental feedback on sodium loop decommissioning.....	217
<i>O. Vinoche, G. Rodriguez</i>	

SESSION 3: FAST REACTOR PHYSICS AND ENGINEERING EXPERIMENTS AND ANALYSES

Analysis of Superphénix and Phénix neutron physics experiments with the ERANOS code and data system.....	231
<i>J. Tommasi, S. Czernecki, G. Rimpault, F. Varaine</i>	

**SESSION 4: PRESERVATION OF FAST REACTOR
KNOWLEDGE AND EXPERIENCE**

R&D LMFRs knowledge preservation French project	243
<i>F. Baqué</i>	
R&D LMFRs knowledge preservation French project: Application to the sodium coolant and cover gas	249
<i>G. Rodriguez</i>	
JNC viewpoint on fast reactor knowledge preservation.....	255
<i>Y. Yokota, P. Harrison, T. Irie</i>	
LIST OF PARTICIPANTS	261
