

CONTENTS

| | | |
|------------|--|-----|
| CHAPTER 1. | INTRODUCTION | 1 |
| CHAPTER 2. | AFTERHEAT REMOVAL IN MODULAR GAS-COOLED REACTORS | 3 |
| 2.1. | AFTERHEAT REMOVAL UNDER ACCIDENT CONDITIONS | 3 |
| 2.2. | OTHER ASPECTS OF AFTERHEAT REMOVAL | 4 |
| 2.2.1. | Afterheat Removal Systems Performance During Normal Operation and Shutdown | |
| 2.2.2. | System Failure and Recovery | |
| 2.2.3. | System Design and Licensing | |
| CHAPTER 3. | MODEL VALIDATION AND CODE TO CODE BENCHMARK EXERCISES | 7 |
| 3.1. | VGM RCCS MOCKUP | 7 |
| 3.1.1. | Description of the Benchmark | |
| 3.1.2. | Analysis of Benchmark Problem Defined on VGM Reactor Results | |
| 3.1.3. | Analysis of VGM Reactor Cavity Cooling System Benchmark Problem With the Moreca Code | |
| 3.1.4. | Results of Calculations of the VG RCCS benchmark | |
| 3.1.5. | Comparison and Conclusions on VGM Reactor Cavity Cooling System Benchmark Problem | |
| 3.2. | HTTR ANALYSIS OF HEAT UP ACCIDENTS | 34 |
| 3.2.1. | Description of HTTR Analysis of heat up accidents | |
| 3.2.2. | Analysis of HTR Heat Up Accidents with the GRSAC Code | |
| 3.2.3. | Results of Calculations of HTTR Heat Up Accidents | |
| 3.2.4. | Analysis of HTTR Heat Up Accidents with the THYDE-HTGR Code | |
| 3.2.5. | Comparison and Conclusions | |
| 3.3. | HTR-10 ANALYSIS OF HEAT UP ACCIDENTS | 64 |
| 3.3.1. | Benchmark Problem Definition on HTR-10 | |
| 3.3.2. | Analysis of the HTR-10 Heat Up Accidents with the TAC-NC Code | |
| 3.3.3. | Analysis of Benchmark Problems defined on HTR-10 | |
| 3.3.4. | Comparison and Conclusion of HTR-10 Benchmark Problems | |
| 3.4. | GT-MHR PLUTONIUM BURNER | 104 |
| 3.4.1. | CRP-3 Benchmark Problem Description for GT-MHR BURNER Accidents | |
| 3.4.2. | Analysis of Benchmark problem for GT-MHR Burner Heat Up Accidents | |
| 3.4.3. | CASTEM model of GT-MHR Plutonium Burner Benchmark | |
| 3.4.4. | Results of the GT-MHR Benchmark with the CFX Code | |
| 3.4.5. | INET Analysis of the GT-MHR Plutonium Burner Benchmark Problem | |
| 3.4.6. | Results of GT-MHR Plutonium Burner Benchmark Calculations | |
| 3.4.7. | Comparison and conclusions | |
| CHAPTER 4. | CODE TO EXPERIMENT BENCHMARK EXERCISES | 185 |
| 4.1. | HTTR RCCS Mockup | 185 |
| 4.1.1. | Description of the GTTR RCCS Mockup and Benchmark Data | |
| 4.1.2. | Results of Simulation of the HTTR RCCS Mockup with the TRIO-EF CASTEM 2000 Code | |
| 4.1.3. | Results of Solution of the HTTR Reactor Cavity Cooling System | |

| | | |
|--------|---|-----|
| 4.1.4. | Calculations of the HTTR Reactor Cavity Cooling System | |
| 4.1.5. | Analysis of HTTR Reactor Cavity Cooling System Benchmark Problem with the MORECA Code | |
| 4.1.6. | Analysis of HTTR Reactor Cavity Cooling System Benchmark Problem with the Fidap-Code | |
| 4.1.7. | Results of Simulation of the HTTR RCCS Mockup with the THANPACST2 Code | |
| 4.1.8. | Comparison and conclusions | |
| 4.2. | THE SANA-1 EXPERIMENTS FOR SELF-ACTING REMOVAL OF THE AFTERHEAT FROM A PEBBLE BED | 296 |
| 4.2.1. | SANA-1 Code to Experiment Summary Description of the Benchmark | |
| 4.2.2. | INET Analysis of SANA-1 Experiment Benchmark Problems | |
| 4.2.3. | TRIO-EF Model of SANA-1 Experimental Set-up | |
| 4.2.4. | Numerical Simulation of the SANA-1 Experiments with the TINTE-Code | |
| 4.2.5. | Comparison and Conclusions of the SANA Benchmark | |
| | APPENDICES | 335 |
| A.1. | DETAILED EXPERIMENTAL DATA SETS FOR THE BENCHMARKS | 335 |
| A.1.1. | SANA-1 | |
| A.1.2. | OKBM Experimental Facilities for testing of HTGRs Components | |
| A.2. | CODE DESCRIPTION | 350 |
| A.2.1. | Description of the CEA TRIO-EF Code | |
| A.2.2. | Description of the VGM, DUPT, SM1 and GTAS Codes | |
| A.2.3. | The ORNL GRSAC Code for Gas-cooled Reactor Simulations | |
| A.2.4. | CFX-F3D | |
| | Participants and Contributors to Drafting and Review | 371 |
