Introduction	7
Résumés of papers	9

OPERATING EXPERIENCE (Session A)

Steam generator of Vandellos Nuclear Power Station: operational experience	19
<i>C. Fernandez Palomero, J. Perez Pallarès</i>	
Design, construction and operating experience of boilers at Wylfa Power Station	29
<i>R.N. Razzell</i>	
Design and performance of the helically coiled boilers of two AGR power stations in the United Kingdom	39
<i>M. El-Nagdy, A.D. Papa</i>	
The early operation of the helical once-through boilers at Heysham 1 and Hartlepool	49
<i>A.J. Mathews</i>	
Heysham II/Torness AGR steam generators	57
<i>A.N. Charcharos, M.B. Wood, J.R. Glasgow</i>	
The THTR steam generator: design, manufacture and installation	77
<i>H.W. Fricker</i>	
First operating experience with the steam generators of the THTR nuclear power plant	86
<i>C. Elter, B. Jürgens, G. Schär</i>	
Mechanical design of the hot steam headers of the THTR-300 steam generators	97
<i>U. Blumer, M. Stumpf</i>	
The internal instrumentation of the THTR steam generator	107
<i>H.W. Fricker</i>	

STEAM GENERATORS FOR NEXT STAGE OF GAS-COOLED REACTORS (Session B)

Steam generator design and development for a helium-cooled modular HTR	115
<i>K. Dumm, E. Zipper, G. Keintzel</i>	
Analysis of the steam generator for the GCR-module	124
<i>M. Podhorsky</i>	
Analysis and manufacture of the HTR-100 steam generator	130
<i>R. Exner</i>	
Steam generator concept of a small HTR for reheating and for removal of the residual heat	141
<i>J. Singh, H. Barnert, H. Hohn, M. Mondry</i>	

MATERIALS DEVELOPMENT AND CORROSION PROBLEMS (Session C)

Steam generator materials constraints in UK design gas-cooled reactors	149
<i>D.W. James</i>	
Single phase and two phase erosion corrosion in boilers of gas-cooled reactors	156
<i>G.S. Harrison, M.J. Fountain</i>	

Plugging of feed inlet tube upstands with Ni/Ti shape memory alloy plugs — Heysham 1 power station	163
<i>A.J. Mathews</i>	

THERMOHYDRAULICS (Session D)

Status of MHTGR steam generator design in the United States of America	171
<i>A.H. Spring</i>	
Main characteristics and design features of steam generators for VG-400 plant	175
<i>V.F. Golovko, V.N. Grebennik, A.O. Gol'tsev, S.M. Ivanov, A.I. Sergeev, V.N. Pospelov</i>	
Influence of the yaw angle on heat transfer and pressure drop of helical type heat exchangers	182
<i>H.G. Gröhn</i>	
Boiler refreruling on the Hartlepool and Heysham 1 advanced gas-cooled reactors	188
<i>J.E. Newell</i>	
Dispersion of hot spots in steam generators	194
<i>E.J. Achenbach</i>	
THTR — Steam generator flow stability	200
<i>M.H. Weber</i>	
Thermohydraulic verification during THTR steam generator commissioning	204
<i>C. Henry, C. Elter</i>	
Experimental investigations of heat exchange and hydrodynamics on models of a VG-400 steam generator tube bundle made up of small diameter helicoils	210
<i>V.F. Golovko, N.A. Ivaskov, P.I. Obukhov, V.N. Pospelov, A.I. Sergeev</i>	
Frequency and distribution of leakages in steam generators of gas-cooled reactors	215
<i>R. Bongartz, G. Breitbach, J. Wolters</i>	
Dynamic simulation of steam generator failures	222
<i>G. Meister</i>	
Chairmen and Secretariat	234
List of Participants	234
