

## CONTENTS

### SELECTION OF CONSTRUCTIONS AND MATERIALS, FUEL ELEMENT DEVELOPMENT CONCEPTS. (SESSION I.)

- Analysis and choice of characteristics of the HTGR spherical fuel elements** . . . . . 5  
*V.N. Grebennik, Yu.G. Degal'tsev, V.A. Karpov, N.N. Ponomarev-Stepnoy, A.N. Protsenko, N.I. Tikhonov, A.A. Khrulev (USSR)*
- Operational requirements of spherical HTR fuel elements and their performance** . . . . . 19  
*K. Rölling, W. Theymann (FRG)*
- Fuel element for the gas-cooled fast breeder reactor BGR-300** . . . . . 40  
*V.D. Kolganov, A.L. Kruglov, V.K. Ulasevich, V.A. Knjazev, N.I. Tichonov, N.N. Ponomarev-Stepnoy, V.P. Ashihmin, M.A. Vorobjev (USSR)*
- Concept, development and reliability of French CO<sub>2</sub>-cooled reactor fuel elements.** . . . . . 51  
*D.Bástien (France)*
- Problems of creating fuel elements for fast gas-cooled reactors working on N<sub>2</sub>O<sub>4</sub> dissociating coolant** . . . . . 56  
*V.B. Nesterenko, V.F. Zelensky, L.I. Kolykhan, G.V. Karpenko, V.S. Krasnorutsky, V.P. Isakov, V.P. Ashihmin, L.N. Permyakov (USSR)*
- The calculation-experimental investigations of the HTGR fuel element construction** . . . . . 66  
*V.S. Ereemeev, V.S. Kolesov, A.S. Chernikov (USSR)*

### FABRICATION OF SPHERICAL COATED FUEL PARTICLES AND FUEL ELEMENTS ON THEIR BASE. (SESSION II.)

- Spherical coated particle fuel for fuel elements of HTGR** . . . . . 81  
*A.S. Chernikov, L.N. Permyakov, L.I. Mikhailichenko, L.B. Nezhevenko, A.P. Gudovich, N.A. Landin, R.A. Ljutikov, G.I. Solovjev (USSR)*
- HTR fuel manufacturing experience** . . . . . 99  
*W. Heit, H. Huschka, A.-W. Mehner (FRG)*
- HTGR spherical fuel elements of the monolithic type bound by pyrocarbon** . . . . . 106  
*V.F. Zelenskiy, V.A. Gurin, S.S. Keruchen'ko, Yu.F. Konotop (USSR)*

<b>HTGR spherical fuel elements and their experimental development</b> . . . . .	<b>113</b>
<i>A.S. Chernikov, Yu.V. Koshelev, L.I. Mikhailichenko, A.A. Kuznetsov (USSR)</i>	
<b>Preparation of microspherical fuel kernels for high-temperature gas-cooled reactors using the mechanical spheroidization method</b> . . . . .	<b>133</b>
<i>A.I. Voloshchuk, V.A. Gurin, N.P. Odejchuk, S.S. Chajka (USSR)</i>	
<b>Features of spherical uranium-graphite HTGR fuel elements control</b> . . . . .	<b>140</b>
<i>I.I. Kreindlin, P.P. Oleynikov, A.S. Shtan (USSR)</i>	

**TESTS AND INVESTIGATION OF PROPERTIES. (SESSION III.)**

<b>Operational experience with HTR-fuel in the AVR experimental power station</b> . . . . .	<b>161</b>
<i>G. Ivens, M. Wimmers (FRG)</i>	
<b>HTR coated particle fuel: irradiation behaviour and performance prediction</b> . . . . .	<b>174</b>
<i>W. Burck, H. Nabielek, A. Christ, H. Rago, A.-W. Mehner</i>	
<b>AGR fuel pin pellet-clad interaction failure limits and activity release fractions</b> . . . . .	<b>189</b>
<i>H. Hughes, R. Hargreaves (UK)</i>	
<b>Research on irradiation Behavior of VHTR fuel</b> . . . . .	<b>201</b>
<i>K. Ikama, K. Fukuda, K. Iwamoto (Japan)</i>	
<b>Microfuel elements and fuel elements studies with the use of pre-irradiation</b> . . . . .	<b>212</b>
<i>N.N. Ponomarev-Stepnoy, A.A. Khroulev, G.V. Momot, V.F. Solenkov, Yu.V. Koshelev, V.A. Gurin (USSR)</i>	
<b>Reactor tests of spherical fuel elements and HTGR microfuel elements and study of their state after irradiation</b> . . . . .	<b>226</b>
<i>V.A. Gurin, Yu.G. Degal'tsev, N.N. Ponomarev-Stepnoy, N.I. Tikhonov, Yu.M. Utkin, A.A. Khroulev, A.S. Chernikov, Ya.I. Shtrombakh (USSR)</i>	
<b>The properties of spherical fuel elements and its behavior in the modular HTR</b> . . . . .	<b>244</b>
<i>G.H. Lohnert, H. Ragoss (FRG)</i>	
<b>Fission product release characteristics of the experimental VHTR core</b> . . . . .	<b>255</b>
<i>S. Mitake, T. Okada, K. Suzuki (Japan)</i>	
<b>The behaviour of spherical HTR fuel elements under accident conditions</b> . . . . .	<b>264</b>
<i>W. Schenk, A. Naoumidis (FRG)</i>	
<b>Post-irradiation examination of HTR-fuel at the Austrian research centre. Seibersdorf Ltd</b> . . . . .	<b>281</b>
<i>G. Reitsamer, E. Proksch, G. Stolba, A. Strige, G. Falta, J. Zeger (Austria)</i>	

**SPENT FUEL TREATMENT AND STORAGE. (SESSION IV.)**

<b>Research, development and demonstration work on interim and final storage of HTR fuel elements</b> . . . . .	<b>303</b>
<i>G. Kaiser, U. Brinkmann, R. Duwe (FRG)</i>	

<b>Interim dry fuel storage for magnox reactors</b> . . . . .	<b>315</b>
<i>N. Bradley, C. Ealing (UK)</i>	
<b>Chemical processing of HTR fuels applying either thorex or purex flow sheets</b> . . . . .	<b>333</b>
<i>E. Zimmer, E. Merz (FRG)</i>	
<b>Process study on advanced graphite-burn method for head-end step of HTR fuel reprocessing</b> . . . . .	<b>345</b>
<i>M. Maeda, T. Tsujino, K. Iwamoto (Japan)</i>	
<b>Head-end processing of HTR fuel elements</b> . . . . .	<b>357</b>
<i>G. Kaiser, H. Barnert-Wiemer, N. Hoogen, J. Wolf (FRG)</i>	
<b>The investigation of HTGR fuel regeneration process</b> . . . . .	<b>369</b>
<i>I.N. Lazarev, I.E. Bertina, V.P. Popik, V.P. Isakov, N.B. Alkhimov, Yu.A. Pokhitonov (USSR)</i>	
<b>On applicability of gas-fluoride technology to regeneration of spent HTGR fuel elements</b> . . . . .	<b>383</b>
<i>V.N. Prusakov, N.M. Trotsenko (USSR)</i>	
 <b>SUMMARY</b>	
<b>List of the participants of the meeting on HTR fuel development</b> . . . . .	<b>408</b>
