

INIS, the International Nuclear Information System, is the world's leading information system on the peaceful uses of nuclear science and technology. Operated by the IAEA, INIS is based on international cooperation with participating Member States and international organizations.

## The INIS Database

### Online and on CD-ROM

- Leading database for literature on nuclear science and technology published worldwide, covering 1950 to the present
- Over 3 million references and abstracts of journal articles, scientific and technical reports, conference papers, books, patents, nuclear laws, regulations, theses and web documents
- Annual increase of over 100 000 records
- Includes a unique online collection of over 230 000 full-text documents of non-conventional literature (see overleaf).
- **Free online access.**

#### Subject Areas

- Nuclear engineering and technology
- Nuclear safety and radiation protection
- Safeguards and non-proliferation
- Applications of nuclear and isotope techniques
- Nuclear and high energy physics
- Nuclear and radiation chemistry
- Nuclear applications in life sciences
- Legal aspects
- Environmental and economic aspects of nuclear and non-nuclear energy sources

### Subscriptions:

#### INIS Database on CD-ROM/DVD

with SPIRS Retrieval Software

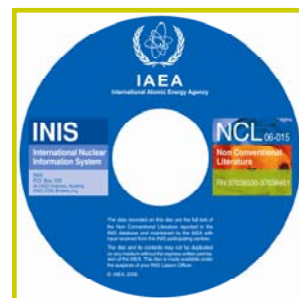

One year subscription with 12 cumulative updates	€ 200*
Set of archival discs 1970-2008	€ 210*
Set of archival discs plus one year subscription	€ 400*

\*) Prices may vary slightly for individual Member States/organizations and are available from INIS Liaison Officers, distributing agents in Member States and the INIS Secretariat at the IAEA

- **Weekly Updates of the INIS Online Database**
- **Monthly Updates of CD-ROMs**

## INIS Collection of Non-Conventional Literature (NCL) On CD-ROM and via the INIS Online Database

- INIS's unique collection of non-conventional or "grey" literature includes currently over 680 000 full-text documents on nuclear science and technology that are not easily available in the public domain.
- Increasing at an annual rate of approximately 25 000 documents, the NCL collection consists of scientific and technical reports, conference papers, patents, theses and preprints.

- The NCL collection of full-text documents is available:
  - on CD-ROM (from 1997 onwards; it consists of over 470 CD-ROMs)
  - online in pdf format (over 230 000 documents are currently available)
  - on microfiche (digitization of documents is an ongoing project).

Individual documents can be ordered from *Document Delivery Services* at the IAEA and in INIS Member States.

- The INIS Online Database allows a full-text search across electronic NCL documents included in the database.
- Results of a query in the INIS Database on CD-ROM can be linked to NCL CD-ROMs to view full-text documents.
- Price: € 40 per CD-ROM
