

CONTENTS

OVERVIEW	7
1. INTRODUCTION	9
2. INTRODUCTORY REMARKS CONCERNING SOURCES, PRODUCTION AND BEHAVIOUR OF VARIOUS RADIONUCLIDES	11
2.1. Sources of radioactivity	11
2.2. Production of various isotopes and their behaviour in LMFBRs	11
3. THE BEHAVIOUR OF ACTIVATION PRODUCTS IN LMFBRs	17
3.1. Behaviour in the gas phase	17
3.2. Behaviour in the sodium	19
4. CONTAMINATION OF LMFBRs BY RADIOACTIVE CORROSION PRODUCTS ...	24
4.1. Levels of gamma activity induced in corrosion products	24
4.2. Corrosion of materials in LMFBRs	25
4.3. Corrosion equations	34
4.4. Deposition behaviour of corrosion products — General comments	37
4.5. Experimental results of release and deposition of radioactive corrosion products	40
4.6. Development of release/deposition models for radioactive corrosion products	48
4.7. Comparison of code results with reactor measurements	53
5. FISSION PRODUCTS IN LMFBRs	62
5.1. Formation and release from fuel	62
5.2. Transfer to the sodium	65
5.3. In-sodium behaviour of fission products	69
5.4. Methods for estimating the distribution of fission products and fissile material in LMFBRs	79
6. THE BEHAVIOUR OF TRITIUM IN LMFBRs	84
6.1. Model to describe the distribution of tritium in LMFBRs	84
6.2. Sources and processes which affect the distribution of tritium in LMFBRs	87
6.3. Instrumentation used for measuring tritium levels	91
6.4. In-reactor measurements	92
6.5. Validation of the Kumar model using reactor measurements	95
7. RADIOACTIVITY LEVELS IN LMFBRs — REACTOR MEASUREMENTS	97
7.1. Reactor measurements — Methods used	97
7.2. Results of reactor measurements	102

8.	THE REMOVAL OF RADIONUCLIDES FROM THE COVER GAS AND SODIUM COOLANT OF LMFBRs	113
8.1.	Removal of radioactive impurities from the cover gas — Methods used on operating reactors	113
8.2.	The removal of fission and activation products from sodium by cold trap	118
8.3.	Removal by special radionuclide traps — Development and experience	121
9.	SUMMARY OF THE BEHAVIOUR OF THE MORE IMPORTANT RADIONUCLIDES IN LMFBRs	131
10.	AREAS FOR FURTHER WORK	135
