

## CONTENTS

Summary.....	1
I. INTERNATIONAL AND NATIONAL CONCEPTS ON FUTURE THORIUM BASED NUCLEAR FUEL CYCLES IN COMPARISON WITH OTHER FUEL CYCLES	
Brazilian experience on thorium fuel cycle investigations.....	13
<i>R. Brant Pinheiro</i>	
Thorium fuel-cycle studies for CANDU reactors.....	25
<i>P.G. Boczar, P.S.W. Chan, G.R. Dyck, R.J. Ellis, R.T. Jones, J.D. Sullivan, P. Taylor</i>	
Studies on thorium fuel cycle in Japan.....	42
<i>N. Hirakawa</i>	
Thorium fuel cycle concept for KAERI's accelerator driven system project .....	54
<i>T.Y. Eom, J.B. Do, Y.D. Choi, K.K. Park, I.K. Choi</i>	
BNFL's view of the thorium development programme .....	60
<i>P.D. Wilson</i>	
Experience of thorium fuel development in India.....	69
<i>S. Majumdar, D.S.C. Purushotham</i>	
Some research and development of thorium fuel cycle in Russia .....	77
<i>M.F. Troyanov, V.G. Ilyunin, A.G. Kalashnikov, B.D. Kuzminov, M.N. Nikolaev, F.P. Raskach, E.Ya. Smetanin, A.M. Tsybulya</i>	
A competitive thorium fuel cycle for pressurized water reactors of current technology.....	83
<i>A. Galperin, A. Radkowsky, M. Todosow</i>	
Nuclear energy research initiative: Thorium fuel cycle projects.....	97
<i>C.A. Thompson</i>	
Recent advances in thorium fuel cycles for CANDU reactors.....	104
<i>P.G. Boczar, G.R. Dyck, P.S.W. Chan, D.B. Buss</i>	
II. THORIUM UTILIZATION, INCLUDING HYBRID SYSTEMS (ADS, FUSION, etc.)	
Thorium cycle implementation through plutonium incineration by thorium molten-salt nuclear energy synergetics .....	123
<i>K. Furukawa, V. Simonenko, K. Mitachi, A. Furuhashi, R. Yoshioka, S. Chigrinov, A. Lecocq, Y. Kato</i>	
A proliferation resistant fusion breeder for thorium fuel cycle .....	139
<i>S. Sahin, B. Sarer, H. Yapici, N. Sahin</i>	
The use of thorium for plutonium utilization in reactors .....	154
<i>V. Dekoussar, V. Ilyunin, A. Kalashnikov, M. Troyanov</i>	
Physics design of advanced heavy water reactor utilising thorium.....	165
<i>A. Kumar, U. Kannan, Y. Padala, G.M. Behera, R. Srivenkatesan, K. Balakrishnan</i>	
Thorium pre-breeder/breeder route to widen the nuclear material base for generation of electric power .....	176
<i>V. Jagannathan</i>	

### III. NUCLEAR AND REACTOR PHYSICS, NUCLEAR DATA AND CORE DESIGN

Thorium utilization in PWRs. Neutronics studies.....	185
<i>A. Puill</i>	
Molten salt reactor benchmark problem to constrain plutonium.....	198
<i>N. Hirakawa, A.I. Aboanber, K. Mitachi, T. Misawa</i>	
Nuclear data evaluation and experimental research of accelerator driven systems using a subcritical assembly driven by a neutron generator .....	207
<i>S. Chigrinov, I. Rakhno, K. Rutkovskaya, A. Kievitskaia, A. Khilmanovich, B. Martsinkevich, L. Salnikov, S. Mazanik, I. Serafimovich, E. Sukhovitskij</i>	
Study of thorium fuel cycles burning plutonium in the Module-HTR.....	215
<i>Jin Xingqing, Xu Yunlin</i>	
Complex reactor physics investigations of thorium containing liquid fuel.....	221
<i>M. Hron</i>	
Assessment of <sup>232</sup> Th nuclear data through critical experiments using the Kyoto University critical assembly.....	237
<i>S. Shiroya, H. Unesaki, T. Misawa</i>	

### IV. TECHNOLOGY AND DESIGN OPTIONS

Thorium-based fuel design for incineration of excess weapon grade plutonium in existing PWRs.....	251
<i>A. Galperin, M. Todosow</i>	
The Indian perspective on thorium fuel cycles.....	257
<i>K. Balakrishnan, S. Majumdar, A. Ramanujam, A. Kakodkar</i>	
Thorium fuel for LWRs and innovative concepts: State of the art at the CEA/DRN .....	266
<i>J. Porta, S. Baldi, A. Puill, F. Huet</i>	
Some peculiarities of thorium dioxide-base fuel production at NSC KIPT .....	280
<i>N.P. Odeychuk, V.F. Zelensky, Yu.F. Konotop, V.A. Gurin</i>	
An ultimate fission energy system option for the next generation – The AMBIDEXTER nuclear complex .....	286
<i>Se Kee Oh, Kunmo Chung</i>	
Perspective of thorium research and boron carbide coating of urania-gadolinia fuel in Turkey .....	294
<i>H. Disbudak</i>	

### V. PROBLEMS TO RESOLVE: SAFETY, NON-PROLIFERATION, ENVIRONMENT PROTECTION

Potential advantages and drawbacks of the thorium fuel cycle in relation to current practice: A BNFL view .....	305
<i>P.D. Wilson, K.F. Ainsworth</i>	
On some issues of thorium fuel cycle study.....	316
<i>M.F. Troyanov</i>	
The non-proliferative commercial Radkowsky thorium fuel concept.....	321
<i>M.J. Higatsberger</i>	
Development requirements in reprocessing thorium fuels .....	343
<i>P.D. Wilson</i>	
List of Participants.....	357
IAEA Publications on Thorium Based Fuel Options .....	369
