

CONTENTS

1. INTRODUCTION	1
2. NATIONAL PRESENTATIONS	1
2.1. China	1
2.2. France	3
2.3. India.....	3
2.4. Japan.....	5
2.5. Republic of Korea	6
3. TECHNICAL SUMMARY	7
3.1. Safety philosophy	7
3.1.1. China	7
3.1.2. France.....	7
3.1.3. India	8
3.1.4. Japan	8
3.1.5. Republic of Korea	8
3.2. Structural integrity assessment.....	8
3.2.1. China	8
3.2.2. France.....	9
3.2.3. India	9
3.2.4. Japan	10
3.2.5. Republic of Korea	10
3.3. Thermal hydraulics.....	10
3.3.1. China	10
3.3.2. France.....	11
3.3.3. India	11
3.3.4. Republic of Korea	12
3.4. Innovative concepts.....	12
3.4.1. China	12
3.4.2. India	12
3.5. Resolved issues.....	13
3.6. Open issues.....	13
3.7. Conclusion.....	14
Safety philosophy of primary pipe rupture event in prototype fast breeder reactor	17
<i>S.B. Bhoje</i>	
Philosophy of leak before break assessment for Japanese prototype FBR	25
<i>T. Wakai, K. Aoto, M. Ichimiya, K. Ito</i>	
Main pipe rupture accident analysis for the Chinese experimental fast reactor.....	35
<i>H. Yang, M. Xu</i>	
Rupture of LIPOSO in Superphenix	47
<i>Ph. Dufour, J. Louvet, P. Lo Pinto</i>	
Theoretical and experimental assessment of structural integrity of primary pipe	57
<i>P. Chellapandi, A. Biswas, S.C. Chetal, S.B. Bhoje</i>	

A simplified crack growth assessment procedure for PCP in FBR.....	73
<i>T. Wakai, K. Aoto</i>	
Thermal hydraulic consequences of primary pipe rupture.....	87
<i>N. Kasinathan, K. Natesan, P. Selvaraj, P. Chelapandi, S.C. Chetal</i>	
Analysis of primary pipe break for the Korean advanced liquid metal reactor (KALIMER).....	105
<i>H.Y. Jeong, W.P. Chang, Y.B. Lee, D. Hahn</i>	
Analysis of emergency situations caused by BN-800 primary circuit pressure pipe depressurization.....	125
<i>V.S. Gorbunov, V.A. Zamiatin, Yu.L. Kamanin, N.G. Kuzavkov, V.A. Sobolev</i>	
Improved primary pipe design concepts for future FBR.....	141
<i>S.C. Chetal, P. Chellapandi</i>	
ABBREIVIATIONS	145
LIST OF PARTICIPANTS	149
