

# CONTENTS

CHAPTER 1. INTRODUCTION .....	1
1.1. World energy situation .....	1
1.2. Global environmental impact .....	1
1.3. Why nuclear power? .....	3
1.4. Why hydrogen? .....	3
1.5. Overview .....	4
References to Chapter 1 .....	4
CHAPTER 2. NUCLEAR POWER AND ITS POTENTIAL FOR HYDROGEN GENERATION ....	7
2.1. Significance of process heat for the industry .....	7
2.2. Nuclear power plants .....	11
2.2.1. Light-water reactor .....	14
2.2.2. High-temperature gas-cooled reactor .....	14
2.3. Components .....	21
2.3.1. Nuclear steam reformer .....	21
2.3.2. Helium-helium intermediate heat exchanger .....	24
2.3.3. Hot gas duct .....	26
2.4. Materials for nuclear power plant and process components .....	27
2.4.1. Materials testing at the Research Center Jülich .....	27
2.4.2. Materials testing at JAERI .....	29
References to Chapter 2 .....	30
CHAPTER 3. SAFETY CONSIDERATIONS CONCERNING NUCLEAR POWER PLANTS ASSOCIATED WITH PROCESS HEAT AND/OR HYDROGEN PRODUCTION ...	33
3.1. Safety design concept specific to nuclear heat utilization systems .....	33
3.2. Safety considerations for a nuclear process heat HTGR .....	35
3.2.1. Activity enclosure .....	35
3.2.2. Primary circuit contamination .....	36
3.2.3. Hydrogen and tritium behavior .....	38
3.2.4. Disturbance during steam reformer operation .....	39
3.2.5. Rupture of helium line in gasifier .....	40
3.2.6. Rupture of process gas feedline .....	40
3.3. Safety and risk assessment for process heat HTGRS .....	43
3.3.1. AVR-II .....	43
3.3.2. HTR-MODUL for process heat application (170 MW(th)) .....	44
3.4. Hydrogen behavior in nuclear power plant accidents .....	46
3.4.1. Phenomena .....	46
3.4.2. Hydrogen mitigation systems .....	47
3.4.3. Accidental hydrogen explosions .....	48
3.4.4. Containment experiments .....	49
3.4.5. Containment modeling .....	53
3.5. Gas explosion research programs .....	55
3.5.1. The German LWR program .....	55
3.5.2. The German PNP program .....	57
References to Chapter 3 .....	58
CHAPTER 4. ENERGY SITUATION AND ACTIVITIES ON NUCLEAR POWER WITH POTENTIAL USE FOR PROCESS HEAT AND HYDROGEN PRODUCTION IN SOME EXEMPLARY COUNTRIES .....	63
4.1. Canada .....	63
4.2. China .....	63

4.2.1.	Energy situation in China .....	63
4.2.2.	Experimental and theoretical activities in China .....	65
4.3.	Germany .....	66
4.3.1.	Energy situation in Germany .....	66
4.3.2.	Experimental and theoretical activities in Germany .....	67
4.4.	Indonesia .....	77
4.4.1.	Energy situation in Indonesia .....	77
4.4.2.	Experimental and theoretical activities in Indonesia .....	77
4.5.	Japan .....	79
4.5.1.	Energy situation in Japan .....	79
4.5.2.	Experimental and theoretical activities in Japan .....	80
4.6.	The Netherlands .....	87
4.7.	Russian Federation .....	88
4.7.1.	Energy situation in the Russian Federation .....	88
4.7.2.	Experimental and theoretical activities in the Russian Federation .....	88
4.8.	South Africa .....	89
4.9.	USA .....	89
4.9.1.	Energy situation .....	89
4.9.2.	Experimental/theoretical activities .....	90
4.10.	Venezuela .....	93
	References to Chapter 4 .....	93
 CHAPTER 5. CONVENTIONAL AND ADVANCED HYDROGEN PRODUCTION METHODS .....		101
5.1.	Decomposition and gasification of fossil fuels .....	101
5.1.1.	Conversion of natural gas .....	101
5.1.2.	Conversion of coal .....	109
5.1.3.	Conversion of oil .....	114
5.1.4.	Conversion of other feedstocks .....	115
5.1.5.	Recovery from refinery offgases .....	117
5.2.	Decomposition of water .....	118
5.2.1.	Electrolysis .....	118
5.2.2.	Thermochemical cycles .....	127
5.2.3.	Photolysis .....	127
5.2.4.	Direct water splitting .....	130
5.3.	Comparison of hydrogen production methods .....	131
5.4.	Production of liquid hydrogen .....	133
5.4.1.	LH <sub>2</sub> production methods .....	133
5.4.2.	Liquefaction plants .....	134
5.4.3.	Production of slush hydrogen .....	135
	References to Chapter 5 .....	136
 CHAPTER 6. STORAGE AND TRANSPORT OF HYDROGEN .....		143
6.1.	Storage of hydrogen .....	144
6.1.1.	Gaseous hydrogen storage .....	144
6.1.2.	Liquid hydrogen storage .....	145
6.1.3.	Hydrogen storage as a metal hydride .....	150
6.1.4.	Others .....	151
6.1.5.	Comparison of storage systems .....	153
6.2.	Transport and distribution of gaseous and liquid hydrogen .....	154
6.2.1.	Pipeline system .....	154
6.2.2.	Vehicle transportation .....	156
6.3.	Chemical energy transmission systems .....	160
6.4.	Chemical heat pump systems .....	162
	References to Chapter 6 .....	163

CHAPTER 7. APPLICATIONS OF HYDROGEN .....	169
7.1. Hydrogen as a raw material in chemical processes .....	169
7.1.1. Ammonia synthesis .....	169
7.1.2. Methanol synthesis .....	170
7.1.3. Direct reduction of iron ore .....	171
7.1.4. Fossil fuel processing .....	172
7.1.5. Fischer-Tropsch synthesis .....	173
7.1.6. Others .....	174
7.2. Hydrogen as a fuel .....	174
7.2.1. Heating .....	174
7.2.2. Fuel cells .....	174
7.2.3. Hydrogen powered vehicles .....	183
7.2.4. Stationary gas turbines .....	186
References to Chapter 7 .....	187
CHAPTER 8. SAFETY RISKS OF A LARGE-SCALE HYDROGEN APPLICATION .....	191
8.1. Properties of hydrogen .....	191
8.2. Safety measures in handling (cryogenic) hydrogen .....	193
8.2.1. Physiological hazards .....	193
8.2.2. Safety measures .....	193
8.3. Effect of hydrogen on materials .....	195
8.3.1. Hydrogen embrittlement .....	196
8.3.2. Low-temperature influence .....	197
8.3.3. Materials questions .....	198
8.4. Theoretical and experimental investigation of accidental release of hydrogen .....	199
8.4.1. LH <sub>2</sub> pool formation, spreading, and vaporization .....	201
8.4.2. Atmospheric dispersion of hydrogen .....	204
8.5. Combustion behavior of hydrogen .....	209
8.5.1. Flame propagation, deflagration .....	209
8.5.2. Flame acceleration and detonation .....	214
8.5.3. Pressure impact and damage analysis .....	221
8.5.4. Safety distance .....	224
8.6. Experience in handling hydrogen .....	226
8.7. Safety and risk assessment for hydrogen containing systems .....	230
8.7.1. General methodology .....	230
8.7.2. Examples .....	231
8.8. Environmental issues .....	236
8.8.1. Water vapor .....	236
8.8.2. Nitrogen oxides .....	237
8.8.3. Hydrogen .....	239
8.8.4. Others .....	239
8.8.5. Modeling .....	239
References to Chapter 8 .....	239
CHAPTER 9. PAST AND PRESENT ACTIVITIES ON HYDROGEN IN THE WORLD .....	249
9.1. General overview .....	249
9.2. Large-scale hydrogen energy systems .....	251
9.2.1. WE-NET project .....	251
9.2.2. Euro-Quebec hydro-hydrogen pilot project .....	255
9.2.3. NHEG project .....	257
9.2.4. PORSHE project .....	258
9.2.5. HYSOLAR project .....	259
9.2.6. Solar-Wasserstoff-Bayern project .....	259

9.2.7. PHOEBUS project.....	261
9.2.8. HYPASSE project .....	263
9.2.9. LH <sub>2</sub> airport.....	263
9.2.10. CRYOPLANE project .....	265
9.2.11. Biohydrogen production system.....	267
9.3. Local hydrogen systems.....	268
9.4. Power generation .....	270
9.5. Activities on hydrogen as a fuel in transportation .....	273
9.5.1. Aviation.....	273
9.5.2. Ground-based vehicles .....	275
References to Chapter 9.....	280
 CHAPTER 10. TRANSITION TO A FUTURE HYDROGEN ENERGY ECONOMY .....	 287
10.1. Transition from fossil to non-fossil energy .....	287
10.2. Design of a hydrogen energy economy.....	290
10.3. Concept of a nuclear hydrogen economy.....	293
10.4. Some interesting assessments .....	295
10.5. Further work .....	296
References to Chapter 10 .....	297
 CHAPTER 11. FINAL REMARKS .....	 299
 CHAPTER 12. SUMMARY .....	 301
 APPENDIX A: THERMOCHEMICAL CYCLES FOR HYDROGEN PRODUCTION .....	 325
A.1. Principle.....	325
A.2. Thermochemical cycles.....	325
A.2.1. Oxide system.....	325
A.2.2. Halide family processes.....	326
A.2.3. Sulfur family processes .....	327
A.3. Thermochemical hybrid cycles.....	328
A.3.1. Sulfuric acid bromine hybrid process.....	329
A.3.2. Sulfuric acid hybrid process .....	329
A.3.3. Hydrocarbon hybrid process.....	330
A.3.4. Metal-metal hydride hybrid process.....	331
References to Appendix A .....	332
 APPENDIX B: CHEMICAL ENERGY TRANSMISSION SYSTEMS.....	 335
B.1. Steam reforming system (EVA/ADAM).....	335
B.2. CO <sub>2</sub> reforming system .....	337
B.3. Methanol system .....	337
B.4. Methylcyclohexane — toluene system.....	338
B.5. NH <sub>3</sub> system .....	339
References to Appendix B.....	340
 APPENDIX C: CHEMICAL HEAT PUMP SYSTEMS.....	 341
C.1. 2-propanol — acetone system .....	341
C.2. Cyclohexane — benzene system .....	341
C.3. Hydride system .....	341
C.4. Sponge iron .....	342
 ABBREVIATIONS .....	 343
CONTRIBUTORS TO DRAFTING AND REVIEW.....	347
