

## CONTENTS

### SUMMARY

#### **BACKGROUND AND SYSTEM DESIGN (Session 1):**

IAEA High Temperature Gas Cooled Reactor Activities

*J. M. Kendall*

Development History of the Gas Turbine Modular High Temperature Reactor

*H. L. Brey*

Study on Coupling a Gas Turbine Cycle to the HTR-10 Test Reactor

*Y. Sun, Y. Zhang, Y. Xu*

Selection of JAERI's HTGR-GT Concept

*Y. Muto, S. Ishiyama, S. Shiozawa*

Features of Adapting Gas Turbine Cycle and Heat Exchangers for HTGRs

*V.F. Golovko, I.V. Dmitrieva, N.G. Kodochigov, N.G. Kuzavkov, A.G. Chudin*

#### **SYSTEM ANALYSIS (Session 2):**

Dynamics of a Small Direct Cycle Pebble Bed HTR

*E.C. Verkerk, A.I. van Heek*

Transient Behaviour and Control of the ACACIA Plant

*J. F. Kikstra, A.H.M. Verkooijen, A.I. van Heek*

Performance Review: PBMR Closed Cycle Gas Turbine Power Plant

*K.N.P. Kumar, A. Tournalidakis, P. Pilidis*

#### **COMPONENT DESIGN (Session 3):**

Study of Fission Product Release, Plate-out and Maintenance in Helium Turbomachinery

*Y. Muto, S. Ishiyama, S. Shiozawa*

Fission Product Transport in the Primary System of a Pebble Bed High Temperature Reactor with Direct Cycle

*A.E. van Heek, N.B. Siccama, P.H. Wakker*

Compact Heat Exchangers Technologies for the HTRs Recuperator Application

*B. Thonon, E. Breuil*

High Temperature Alloys for the HTGR Gas Turbine: Required Properties and Development Needs

*R. Coutourier, C. Excaravage*

Nuclear Graphite for High Temperature Reactors

*B.J. Marsden*

Auxiliary Bearing Design Considerations for Gas-Cooled Reactors

*S.R. Penfield Jr., E. Rodwell*

List of Participants
