

CONTENTS

1.	INTRODUCTION.....	1
	References to Chapter 1.....	2
2.	HTGR HEAT SOURCE AND UTILIZATION.....	3
	2.1 Differences in the Use of Conventional & HTGR Heat Sources.....	3
	2.1.1 Advantages and disadvantages of HTGR heat sources.....	5
	References to Chapter 2.....	10
3.	HIGH TEMPERATURE ENGINEERING TEST REACTOR.....	11
	3.1 Design of the HTTR.....	11
	3.1.1 System layout.....	12
	3.1.2 Reactor building.....	13
	3.1.3 Reactor containment vessel.....	13
	3.1.4 Reactor pressure vessel.....	15
	3.1.5 Core.....	16
	3.1.6 Fuel.....	16
	3.1.7 Reactor internals.....	17
	3.1.8 Control system.....	18
	3.1.9 Cooling system.....	18
	3.1.10 Intermediate heat exchanger.....	20
	3.2 Modes of Operation.....	22
	3.2.1 Major technical parameters.....	22
	3.3 Safety Requirements.....	23
	3.4 Heat Utilization System.....	24
	References to Chapter 3.....	25
4.	HEAT UTILIZATION SYSTEMS FOR COUPLING TO THE HTTR...	27
	4.1 Steam Reforming of Methane to Produce Hydrogen & Methanol.....	27
	4.2 CO ₂ Reforming of Methane to Produce Hydrogen and Methanol.....	29
	4.2.1 Introduction.....	29
	4.2.2 Chemistry.....	29
	4.2.3 Feedstock.....	30
	4.2.4 Applications.....	30
	4.3 Coal Conversion.....	32
	4.4 Thermochemical Water Splitting for Hydrogen Production.....	33
	4.5 High Temperature Electrolysis of Steam for Hydrogen Production....	35
	4.6 Gas Turbine for Electricity Production.....	36
	4.7 Steam Generation for Oil Recovery.....	39
	4.7.1 Heavy oil recovery.....	39
	4.7.2 Tar sands oil recovery.....	41
	References to Chapter 4.....	43

5.	CANDIDATE HEAT UTILIZATION SYSTEMS TO BE CONNECTED TO THE HTTR.....	45
5.1	Considerations Determining Priorities of the HTTR System.....	45
5.2	Steam Reforming of Methane for Hydrogen and Methanol.....	47
5.2.1	The Japanese process design.....	47
5.2.2	Engineering design.....	51
5.2.3	Safety requirements.....	56
5.2.4	Goals of the HTTR demonstration.....	62
5.2.5	Alternative Designs – German experience.....	63
5.2.6	Alternative designs – Chinese programme.....	85
5.2.7	Steam reforming of methane – Russian activities.....	90
5.3	CO ₂ Reforming of Methane to Produce Hydrocarbons and Methanol..	94
5.3.1	The process.....	94
5.3.2	Catalysts.....	98
5.3.3	Type of reformers & experience gained in solar reformers.....	103
5.3.4	Potential applications for nuclear CO ₂ /CH ₄ reformers.....	107
5.3.5	Goals for HTTR demonstration & development needs.....	109
5.4	Gas Turbine for Electricity Generation.....	110
5.4.1	International GT-MHR programme – direct cycle.....	111
5.4.2	South Africa programme – direct cycle.....	117
5.4.3	Chinese programme – indirect cycle.....	120
5.4.4	Japanese Gas turbine Programme.....	125
5.4.5	HTTR coupled to closed cycle helium turbine.....	129
5.4.6	Component testing programme.....	134
	References to Chapter 5.....	143
6.	ACHIEVEMENTS OF OTHER HIGH TEMPERATURE ENDOTHERMIC TECHNOLOGIES & SUPPORTING ACTIVITIES....	149
6.1	Thermochemical Water Splitting to Produce Hydrogen, “IS” Process..	149
6.1.1.	Major process parameters.....	149
6.1.2	Achievements – laboratory scale.....	151
6.1.3	Industrial scale up – materials development.....	153
6.1.4	R&D programme.....	155
6.2	Hydrogen Production by High Temperature Electrolysis of Steam.....	156
6.2.1	Experimental results obtained with tubular cells.....	157
6.2.2	Experimental results obtained with planar cell.....	160
6.2.3	Concluding remarks.....	164
6.3	Coal Conversion.....	165
6.3.1	The lignite hydrogasification process.....	166
6.3.2	Nuclear steam gasification of hard coal.....	168
6.3.3	Development of nuclear coal conversion technology.....	172

6.4 Natuna Gas using Nuclear Heat.....	175
6.4.1 Background.....	175
6.4.2 Nuclear heat for upgrading Natuna gas.....	176
6.4.3 Economic considerations.....	177
6.4.4 Economic assessment.....	178
References to Chapter 6.....	179
7. SUMMARY AND CONCLUSIONS.....	183
7.1 High Temperature Engineering Test Reactor.....	183
7.2 Prioritization of Heat Utilization Systems.....	183
References to Chapter 7.....	187
Appendix A: RESEARCH & DEVELOPMENT NEEDS FOR THE FUTURE....	189
Appendix B: FREQUENTLY USED ABBREVIATIONS.....	191
RESEARCH COORDINATION MEETINGS & TECDOC CONTACTS.....	197
PARTICIPANTS & CONTRIBUTORS TO DRAFTING AND REVIEW.....	199
