INTRODUCTION	5
SUMMARY OF SESSIONS	7
COMPONENTS DESIGN AND TESTING — IMPLICATIONS FOR MATERIALS (Session I)	
Service conditions and relevant properties of HTGR metallic materials	15
<i>E. Bodmann, H. Diehl, I. Blume-Firla, H. Demus</i>	
A proposal to develop a high temperature structural design guideline for HTGR components	28
<i>K. Hada</i>	
Design requirements for high temperature metallic component materials in the US modular HTGR	34
<i>A.S. Shenoy, W.S. Betts</i>	
Structural integrity evaluation of a helically-coiled He/He intermediate heat exchanger	42
<i>M. Okubo, K. Hada, O. Baba</i>	
MICROSTRUCTURE AND ENVIRONMENTAL COMPATIBILITY (Session II)	
Structural instabilities of high temperature alloys and their use in advanced high temperature gas cooled reactors (<i>Abstract</i>)	53
<i>H. Schuster, P.J. Ennis, A. Czyska-Filemonowicz, H. Nickel</i>	
Correlation between microstructure and the creep behaviour at high temperature of Alloy 800 H	54
<i>K. Spiradek, H.P. Degischer, H. Lahodny</i>	
Thermal stability and environmental compatibility of Inconel 617	65
<i>O.F. Kimball</i>	
Corrosion behaviour of high temperature alloys in the cooling gas of high temperature reactors	72
<i>W.J. Quadackers, H. Schuster</i>	
MECHANICAL PROPERTIES (Session III)	
Current status of studies on high temperature metallic materials for HTGR applications in JAERI	81
<i>H. Tsuji, H. Nakajima, T. Kondo</i>	
High temperature low-cycle fatigue strength of Hastelloy-XR	91
<i>K. Nagato, T. Murakami, T. Hashimoto</i>	
Evaluation of mechanical properties of the alloy NiCr22Co12Mo (Alloy 617) for heat exchanging components of HTGRs	96
<i>H. Breitling, W. Dietz, H.J. Penkalla</i>	

Multiaxial creep of tubes of Alloy 800 and Alloy 617 at high temperature	105
<i>H.J. Penkalla, F. Schubert, H. Nickel</i>	
Fatigue properties of nickel-base high temperature alloys for HTGRs	115
<i>H. Tsuji, H. Nakajima</i>	
Post-service examination of a 10 MW helium-helium heat exchanger and comparison with long term behaviour in laboratory tests	129
<i>R.H. Cook, R. Exner, L.W. Graham</i>	
Creep and fatigue crack growth in tubes of HTR components	136
<i>M. Rödiger, M. Pfaffelhuber, F. Schubert, E. Bodmann, H. Nickel</i>	
Fracture mechanical characteristic values (J-integral) with transference to components (tubes) by an analytical method	143
<i>G. Ullrich, H. Huthmann, L. Grueter, H.P. Alder</i>	
Fracture toughness of Alloy 800 H at room temperature	149
<i>K. Krompholz, G. Ullrich, H.P. Alder, G. Gnirss, H. Huthmann, M. Rödiger, F. Schubert</i>	

NEW ALLOYS AND DEVELOPMENTS (Session IV)

The new alloy Thermon 4972 (NiCr22W12Fe) for high temperature components of gas-cooled reactors	159
<i>B. Huchtemann</i>	
Comparison of mechanical and corrosion behaviour of Alloy 800 H and the new alloy AC 66	168
<i>W. Pelz, W. Schendler, H. Weber</i>	
Experimental and theoretical work for the analysis of creep ratcheting and creep buckling of HTR components	182
<i>G. Breitbach, F. Schubert, H.J. Seehafer, H. Nickel</i>	
Development and validation of an improved creep-fatigue interaction rule for lifetime determination of high temperature components	189
<i>H.-J. Lehmann, M. Becker, M. Lüdeke</i>	
Wear stresses in ceramic layers at elevated temperatures under helium atmosphere	196
<i>H. Fricker, G. Ullrich, H.P. Alder</i>	
Promising materials for HTGR high temperature heat exchangers	201
<i>E.V. Kuznetsov, T.B. Tokareva, A.V. Ryabchenkov, O.V. Novichkova, Yu.D. Starostin</i>	
List of Participants	211
