

CONTENTS

| | | |
|----|---|----|
| 1. | INTRODUCTION | 1 |
| 2. | SUMMARY AND CONCLUSIONS | |
| | 2A. Safety and Licensing Experience of GCRs | 1 |
| | 2B. Safety Analysis and Research | 3 |
| | 2C. Future Prospects for GCR Safety | 4 |
| | 2D. Panel Discussion | 5 |
| 3. | CONTRIBUTIONS | |
| | Operational experience at Fort St. Vrain, a unique nuclear power plant | 6 |
| | G.C. Bramblett, C.R. Fisher, F.E. Swart | |
| | Safety aspects of the operation experience with the AVR experimental power station | 10 |
| | G. Ivens, E. Ziermann | |
| | Accident analysis and accident control for the THTR - 300 power plant | 16 |
| | R. Breitenfelder, W. Wachholz, U. Weicht | |
| | THTR steam generator licensing experience as seen by the manufacturer | 22 |
| | H.W. Fricker | |
| | Advanced gas-cooled reactors (AGR) | 27 |
| | R.M. Yeomans | |
| | Gas-cooled breeder reactor safety | 39 |
| | J. Chermanne, P. Burgsmüller | |
| | Gas-cooled fast reactor safety - an overview and status of the U.S. program | 51 |
| | A. Torri, D.R. Buttemer | |
| | Personnel radiation exposure in HTGR plants | 57 |
| | S. Su, B.A. Engholm | |
| | Developmental assessment of the Fort St. Vrain version of the composite HTGR analysis program (CHAP-2) | 63 |
| | K.R. Stroh | |
| | Probabilistic risk assessment of HTGRs | 68 |
| | K.N. Fleming, W.J. Houghton, G.W. Hannaman, V. Joksimovic | |
| | Results of a German probabilistic risk assessment study for the HTR-1160 concept | 73 |
| | J. Fassbender, W. Kröger | |
| | Efficiency of inherent protection mechanisms for an improved HTR safety concept | 87 |
| | K. Petersen, R. Blücher, H. Gerwin, W. Schenk | |
| | Model experiments on depressurisation accidents in nuclear process heat plants (HTGR) | 95 |
| | G. Fitsching, G. Wolf | |

| | |
|---|---------|
| Rapid depressurization of a Helium vessel: a comparison between experimental data and one- dimensional analysis | 102 |
| M. Dang, J.-F. Dupont, H. Weber | |
| The HTR safety concept demonstrated by selected examples | 110 |
| H. Sommer, D. Stölzl | |
| HTGR safety research program | 118 |
| A.W. Barsell, B.E. Olsen, F.A. Silady | |
| Aspects of water and air ingress accidents in HTRs | 124 |
| J. Wolters | |
| A detailed study of the steam entry effect of a GCFR | 132 |
| W. Heer, P. Stiller, H.U. Wenger, P. Wydler | |
| Pressure transients analysis of a high-temperature gas-cooled reactor with direct helium turbine cycle | 137 |
| M. Dang, J.-F. Dupont, P. Jacquemoud, R. Mylonas | |
| Investigation on the depressurization behaviour of a typical HHT thermal insulation | 154 |
| H. Weber | |
| Safety assessment of a multicavity prestressed concrete reactor vessel with hot liner | 163 |
| R. Lafitte, J.D. Marchand | |
| Licensing of HTGRs in the United States | 184 |
| C.R. Fisher, D.D. Orvis | |
| Safety design features for current UK advanced gas-cooled reactors | 191 |
| J.M. Yellowlees, E.C. Cobb | |
| The reactor safety study of experimental multi- purpose VHTR design | 198 |
| T. Yasuno, S. Mitake, M. Ezaki, K. Suzuki | |
| HTGR safety philosophy | 207 |
| V. Joksimovic, C.R. Fisher | |
| Analysis of some accident conditions in confirmation of the HTGR safety | 214 |
| V.N. Grebennik, E.I. Grishanin, N.E. Kukharkin, P.V. Mikhailov, V.V. Pinchuk, N.N. Ponomarev-Stepnoy, G.I. Fedin, V.N. Shilov, I.V. Yanushevich | |
| Use of natural circulation mechanism for core cooling of high temperature Helium-cooled reactors as a means of safety enhancement | 222 |
| M.S. Belyakov, V.D. Kolganov, S.S. Kochetkov, V.P. Smetannikov, V.K. Ulasevich | |
| Investigations of gas explosions in a nuclear coal gasification plant | 233 |
| K. Schulte | |
| 4. AGENDA OF THE MEETING | 254 |
| 5. LIST OF PARTICIPANTS | 256 |
