| Summary of the Specialists Meeting | 7 |
|--|---|

SUMMARIES OF CURRENT RESEARCH AND DEVELOPMENT PROGRAMMES FOR FUEL (Session I)

| | |
|--|----|
| Overview of current research and development programmes for fuel in Japan | 19 |
| <i>S. Shiozawa</i> | |
| HTGR programme in the United States of America | 21 |
| <i>J.E. Fox</i> | |
| French programme for HTR fuel | 23 |
| <i>R.M. Gillet</i> | |
| HTR fuel element development in the Federal Republic of Germany | 24 |
| <i>E. Balthesen</i> | |
| Review of current work on investigation of HTGR fuel in the Union of Soviet Socialist Republics | 25 |
| <i>V.N. Grebennik</i> | |

FUEL MANUFACTURE AND QUALITY CONTROL; SAFETY REQUIREMENTS (Session II)

| | |
|---|----|
| Safety requirements and research and development on HTTR fuel | 31 |
| <i>S. Saito, S. Shiozawa, K. Fukuda, T. Kondo</i> | |
| Production process and quality control for the HTTR fuel | 37 |
| <i>S. Yoshimuta, N. Suzuki, M. Kaneko, K. Fukuda</i> | |

MODELLING OF FISSION PRODUCT RELEASE — PART I (Session III)

| | |
|--|----|
| Modeling of fission product release behavior from HTR spherical fuel elements under accident conditions | 45 |
| <i>K. Verfondern, D. Müller</i> | |
| Analytical method of fractional release of fission products from fuel elements of HTTR | 55 |
| <i>K. Sawa, S. Shiozawa, K. Fukuda, Y. Ichihashi</i> | |
| Release behavior of metallic fission products from fuel for HTTR | 61 |
| <i>K. Hayashi, K. Fukuda, S. Shiozawa</i> | |

MODELLING OF FISSION PRODUCT RELEASE — PART II (Session III — cont.)

| | |
|---|----|
| Behaviour of HTGR coated particles and fuel elements under normal and accident conditions | 71 |
| <i>A.I. Deryugin, K.N. Koshcheev, G.V. Momot, A.A. Khrulyov, A.S. Chernikov</i> | |
| Diffusion modeling of fission product release during depressurized core conduction cooldown conditions | 77 |
| <i>R.C. Martin</i> | |

**IRRADIATION TESTING/OPERATIONAL EXPERIENCE WITH FUEL ELEMENTS
(Session IV)**

| | |
|--|----|
| Testing of irradiated spherical fuel elements at HTR MODUL relevant accident conditions | 87 |
| <i>W. Schenk, H. Nabielek</i> | |
| The THTR-300 coolant gas activity, an indicator of fuel performance | 99 |
| <i>K. Röllig</i> | |

**BEHAVIOUR AT DEPRESSURIZATION, CORE HEAT-UP, POWER TRANSIENTS,
WATER/STEAM INGRESS — PART I (Session V)**

| | |
|---|-----|
| Preliminary safety assessment of the 450 MWT MHTGR | 111 |
| <i>T.D. Dunn, K. Datta, C. Hoot</i> | |
| Analytical method and result of fission product release from core during a depressurization accident of HTTR | 117 |
| <i>K. Sawa, H. Mikami, Y. Tazawa, S. Shiozawa</i> | |
| Problems of investigation of HTGR fuel elements under loss-of-pressure accident conditions .. | 124 |
| <i>I.S. Mosevitskij, A.V. Djakov</i> | |
| Fission product retention in TRISO coated UO ₂ particle fuels subjected to HTR simulated core heating tests | 132 |
| <i>C.A. Baldwin, M.J. Kania</i> | |
| Fission gas release during hydrolysis of exposed fuel kernels | 139 |
| <i>M.B. Richards, D.L. Hanson, R.F. Turner</i> | |
| Effect of water vapor on the release of fission gases from UCO in HTGR coated fuel particles | 143 |
| <i>B.F. Myers</i> | |

**BEHAVIOUR AT DEPRESSURIZATION, CORE HEAT-UP, POWER TRANSIENTS,
WATER/STEAM INGRESS — PART II (Session V — cont.)**

| | |
|--|-----|
| HTGR fuel elements operating conditions during accidents with abrupt power raise | 155 |
| <i>V.S. Gorbunov, A.I. Kiryushin, N.G. Kuzavkov, Yu.P. Sukharev</i> | |
| In-pile corrosion of grade H-451 graphite by steam | 157 |
| <i>M.B. Richards, A.G. Gillespie, D.L. Hanson</i> | |
| List of Participants | 163 |
