INTERNATIONAL WORKING GROUP ON GAS-COOLED REACTORS

---

Specialists Meeting  
on  
Coolant Chemistry, Plate-out and Decontamination  
in Gas-cooled Reactors

Juelich, Federal Republic of Germany  
2-4 December 1980

SUMMARY REPORT

INTERNATIONAL ATOMIC ENERGY AGENCY

Specialists' Meeting  
on  
Coolant Chemistry, Plate-out and Decontamination  
in Gas-cooled Reactors

Juelich, Federal Republic of Germany  
2-4 December 1980

Chairman: C.-B. von der Decken  
Kernforschungsanlage Juelich GmbH.  
Institut fuer Reaktorbauelemente  
Juelich, Federal Republic of Germany

Scientific Secretary: J. Kupitz  
International Atomic Energy Agency  
Vienna, Austria

SUMMARY REPORT

## CONTENTS

1. INTRODUCTION .....	5
2. SUMMARY AND CONCLUSIONS	
2A. Fission Product Plate-out 1 & 2 .....	5
2B. Decontamination of Activity .....	6
2C. Coolant Chemistry .....	6
2D. Discussions, Conclusions and Recommendations .....	7
3. CONTRIBUTIONS	
In-pile helium loop "Comedie" .....	8
J J. Abassin, R.J. Blanchard, J. Gentil	
Out-of-pile helium loop for liftoff experiments .....	17
R.J. Blanchard, A. Bros, J. Gentil	
Experimental facilities for plate-out investigations and future work .....	26
K. Muenchow, H. Dederichs, N. Iniotakis, B. Sackmann	
Results from plate-out investigations .....	35
N. Iniotakis, J. Malinowski, H. Gottaut, K. Muenchow	
F.P. plate-out study using in-pile loop OGL-1 .....	44
O. Baba	
Fission product behavior in the peach bottom and Fort St. Vrain HTGRs .....	49
D.L. Hanson, N.L. Baldwin, D.E. Strong	
Iodine sorption and desorption from low-alloy steel and graphite .....	55
R.P. Wichner, M.F. Osborne, R.A. Lorenz, R.B. Briggs	
Remarks on possibilities and limitations of theoretical approach to plate-out problems .....	64
E. Obryk	
Fission product behaviour in the primary circuit of an HTR .....	68
C.-B. von der Decken, N. Iniotakis	
Derivation of criteria for primary circuit activity in an HTGR .....	75
S.D. Su, A.W. Barsell	
The influence of dust on the hazard potential of a depressurization accident of a high temperature reactor .....	81
N. Iniotakis, C.-B. von der Decken	
Modelling of plate-out under gas-cooled reactor (GCR), accident conditions .....	87
A.R. Taig	
Safety research on iodine plate-out during postulated HTGR core heatup events .....	94
A.W. Barsell, O.P. Chawla, C.G. Hoot	
Plate-out measurements and decontamination of a component of the AVR reactor at Juelich .....	99
J. Hanulik, H. Schmied, J. Wahl	

Evaluation of a decontamination model .....	107
D.W.T. Ripplin, J. Hanulik, E. Schenker, G. Ullrich	
Decontamination and high temperature materials .....	114
E. Schenker, G. Ullrich, J. Hanulik, W.B. Waeber, K.H. Wiedemann	
Maintenance concept of the gas turbine in a 1640 MW direct cycle HTR .....	118
H. Schmied, H. Karaus, K. Roellig, E. Schenker	
Coolant Chemistry of the advanced carbon dioxide cooled reactor ....	125
R.L. Faircloth, K.S. Norwood, H.A. Prior	
Primary coolant chemistry of the Peach Bottom and Fort St.Vrain high-temperature gas-cooled reactors .....	132
R.D. Burnette, N.L. Baldwin	
Chemical reactions during nuclear drying of the AVR primary circuit following a water ingress .....	137
R. Nieder, K. Vey	
Predictions on an HTR coolant composition after operational experience with experimental reactors .....	144
R. Nieder	
Tritium behaviour in an HTR-system based on AVR-experience .....	153
W. Steinwarz, H.D. Roehrig, R. Nieder	
 4. AGENDA OF THE MEETING	 161
5. LIST OF PARTICIPANTS	163
