Joint UAE-IAEA Nuclear Energy Management School 17–28 May 2015, Abu Dhabi, UAE

The Nuclear Energy Management School, organized by the International Atomic Energy Agency (IAEA) in cooperation with the Khalifa University (KU), the Federal Authority for Nuclear Regulation (FANR), Emirates Nuclear Energy Corporation (ENEC) and the Critical Infrastructure and Coastal Protection Authority (CICPA), will be held from 17 to 28 May 2015 in Abu Dhabi, United Arab Emirates.

The purpose of the Joint UAE-IAEA Nuclear Energy Management School is to provide a unique, international educational experience aimed at building future leadership to manage nuclear energy programmes, to promote and foster knowledge of a wide range of issues related to the peaceful use of nuclear technology, and to provide a unique worldwide networking opportunity for future managers in the area of nuclear energy.

During the two-week course, selected participants will be exposed to a wide range of different teaching and training activities including lectures, site visits, discussions, group work and presentations. Around 20 international experts and IAEA staff will focus on:

Management (economics of nuclear power, energy policy and energy planning, legal aspects, knowledge management, human resource management, stakeholder involvement, etc.);

The fundamentals of nuclear energy in theory and practice (present and advanced nuclear technologies, nuclear fuel cycle, nuclear safety, nuclear security, nuclear safeguards, radiation control, etc.).

Participants will be given the opportunity to visit nuclear-related facilities within the UAE. All participants are expected to take an active part in activities of the School.

Three reasons to attend the School:

- The School curriculum covers the most important issues and challenges facing the nuclear energy sector.
- A faculty of unrivalled, internationally recognized experts. You will learn from some of the finest minds in the nuclear sector.
- A unique opportunity to broaden your horizons and to meet fellow professionals from around the world interested in nuclear energy.
