INIS AT A GLANCE

(as of 31 December 2017)

47	years since the IAEA, in cooperation with interested Member States and international organizations, established the International Nuclear Information System (INIS).
155	INIS members — 131 Member States and 24 international organizations.
1	main objective — to acquire, process and preserve conventional and non-conventional literature on the peaceful uses of nuclear science and technology.
3	additional objectives: provide free and open access to nuclear information; develop and maintain a nuclear knowledge organization system; and assist IAEA Member States in building their scientific information management capacities.
11	INIS staff members supported by 5 Systems and Development Support Group (SDSG) staff.
€1.9 million	INIS budget for 2017.
8	languages of the INIS Thesaurus: Arabic, Chinese, English, French, German, Japanese, Russian, and Spanish.
31 158	descriptors in the INIS Thesaurus; 22 333 valid descriptors and 8825 forbidden terms.
4.1 million	bibliographic records in the INIS repository. 103 401 added in 2017.
1.6 million	full-text documents available through the repository; 540 000 of which are hosted at INIS.
20 276	full-text documents added to the repository in 2017.
986 GB	of data in the INIS repository.
2.9 million	visits to the INIS repository and 1 million unique visitors in 2017.
1.6 million	unique searches of the INIS repository
4.4 million	full-text documents downloaded through Google search results in 2017; 121 127 directly through the INIS repository website.
64 575	visits and 45 074 unique visitors to the INIS website in 2017.
121 572	INIS website page views in 2017.
11 486	PDF documents digitized from the INIS NCL collection on microfiche in 2017.
9	INIS Information letters sent to INIS members.
120	Twitter messages sent to 882 followers.
9	INIS highlights posted on the INIS website.

WORLD NUCLEAR UNIVERSITY (WNU)

The International Nuclear Information system (INIS) was established by the IAEA in collaboration with interested Member States and some international organizations in 1969 with the objective of providing information on scientific literature published world-wide on the peaceful uses of nuclear energy. INIS operates under membership arrangements that set specific duties and privileges.

PAGES	Public Access Gateway for Energy & Science
SDSG	Systems Development and Support Group
TC	Department of Technical Cooperation

OVERVIEW

A main objective of INIS is to assist Member States in building their scientific information management capacities, such as to collect and preserve nuclear information. INIS initiated a number of activities in 2017, such as sharing know-how on bibliographic systems, assistance in setting up national information management centres, and provision of training.

INIS MEMBERSHIP

In 2017, INIS comprised 131 Member States and 24 international organizations (Table 1). The Kingdom of Lesotho was the most recent Member State to join INIS.

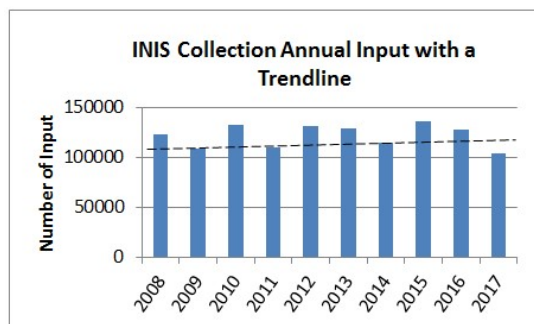

INIS REPOSITORY

The INIS repository consists of bibliographic records of both conventional and non-conventional (NCL) literature, as well as full-text records. Full-text consists of records hosted in the repository as PDFs, as well as URLs leading to full-texts hosted elsewhere. In 2017, the INIS repository consisted of 4.1 million records, 1.6 million of them leading to full-text documents.

Bibliographic Records

The INIS repository currently comprises 4 101 248 bibliographic records.

In 2017 (Volume 48), 103 401 bibliographic records were added (Figure 1-5 and Table 5).

48 780 of these records (Table 5) were prepared by 63 Member States and international organizations.

This represents an increase of 8.4% compared to 2016 and the highest input received from INIS Centres since 2014 (Figure 4).

18 225 NCL records were added to the repository, representing 17.7% of the total input for 2017.

Around 76% of all bibliographic records entered into the INIS repository were journal articles, followed by miscellaneous (14%), books (6%), and reports (4%) (Figure 6).

INIS repository input by subject area remained similar to previous years. The majority of newly added records covered Life Sciences (13%), Engineering and Instrumentation (12%), Atomic, Molecular and Condensed Matter Physics (12%), Nuclear Physics (11%), Nuclear Materials (11%), and Nuclear Power and Safety (9%) (Figure 7).

Records of voluntary input were submitted by France (875), the United States (547), Germany (77), Republic of Korea (56), India (55), Cuba (21), Japan (18), Senegal (13), Lebanon (6), Madagascar (5), Burundi (2) and JINR (1) (Table 5).

The INIS Secretariat continued to perform automated checks on the indexing consistency of Members' input to identify records requiring manual verification. By the end of 2017, INIS subject specialists reviewed and, when necessary, corrected the indexing of 24 692 such records.

Nuclear science and technology are fields of great interest in research, resulting in the accumulation of many new journal articles, books and reports. However, there is a delay in making this literature available to end users. Factors impacting the delay are publication, distribution, processing, and data entry. The delay, or 'time lag', represents the difference between the publication date and the date of input to the INIS repository. The average time lag for all types of literature entered in the INIS repository in 2017 was 20 months. Journal articles had a time lag of 15 months (Figure 5).

Conference proceedings were submitted by 37 Member States, 3 International Organizations, and the IAEA. These additional efforts improved the coverage of conference literature in INIS.

Full-texts

1.6 million full-text records were available through the INIS repository and over half a million were hosted by INIS as PDFs. The full-texts of 9582 NCL records, 52.6% of all NCL, were submitted as 8832 PDF files by 34 INIS members.

The top ten contributors were responsible for over 83% of all NCL input. France, with 2120 records, was the largest contributor of full-texts — 22.1% of all NCL — including many old dissertations currently being digitized by the French INIS Centre. Other top contributors included Brazil (17.9%), the IAEA (12.4%), Japan (8.6%) and the Russian Federation (6.6%) (Table 6).

In 2017, 20 276 full-texts were added to the repository, including 8832 from regular input, 11 486 digitized from microfiche and 3 out of print IAEA books, equalling 86 GB of data and over 1 million pages. At year's end, there were 548 573 full-texts in the repository, 403 442 of which are available to the public.

Digitization of the INIS Microfiche Collection

Almost 90% of the microfiche collection has been digitized since 2003, the beginning of the digitization project. This amounts to 463 GB of data, comprising over 15.8 million pages and over 314 000 electronic full-texts. Approximately 1 million pages need to be processed before project completion. The aim is the complete integration of the microfiche-based NCL into the repository, providing online access to the full-texts (Table 7).

CAPACITY BUILDING

Several capacity building activities were initiated by INIS in cooperation with the IAEA technical cooperation programme (TC), providing assistance to the INIS Centres of Burundi, Namibia, Rwanda, Tanzania and Zimbabwe.

INIS provided ongoing support to a TC project for Namibia to establish a national science and technology digital repository.

The recently opened INIS Centre of Burundi was provided with IT equipment through TC, enabling the preparation of input, the provision of nuclear information services to its users, and promotional activities. This support was featured in an article published on the IAEA news website.

INIS reviewed and provided input to the IAEA TC Country Programme Framework 2016-2021 for a number of IAEA Member States.

PUBLICATIONS

INIS Thesaurus

The INIS Thesaurus contains 31 158 descriptors, 22 333 of which are valid descriptors and 8825 of which are forbidden terms.

The INIS online Thesaurus Advisory Group agreed to add over 150 new descriptors to the online thesaurus, CAI, and FIBRE+. The group was created to evaluate proposals for new descriptors and other thesaurus related topics.

Maintenance of the INIS Thesaurus continued and the fully updated version is now available on the INIS website.

The English version of the INIS Thesaurus is updated monthly, providing users with the latest version in a single document.

Monthly thesaurus supplements were made available on the INIS website, and INIS Thesaurus document identification numbers were adapted.

As agreed at the 37th ILOM in 2014, the multilingual thesaurus is updated twice a year — in January and July. The INIS Secretariat will continue to solicit translation lists from the respective national INIS Centres to be imported into the INIS Thesaurus.

The INIS Centres of Japan and Germany provided quarterly updated translations of the thesaurus. The INIS Centres of China, France, Russia, Spain and Syria also provided updated translations. These are available on the INIS website.

INIS Thesaurus links are provided to all language versions, the Thesaurus supplements, the Interactive Multilingual INIS Thesaurus with navigation capabilities, and the multilingual dictionaries without thesaurus hierarchy.

INIS List of Journal Titles

The *INIS List of Journal Titles by Country or International Organization Name* was updated in February 2018 and can be viewed on the INIS website.

COOPERATION WITH INIS MEMBERS

In October, the INIS Training Seminar took place in Vienna, attended by information specialists from 22 Member States. The training seminar strengthens Member States' nuclear information capacities, training participants in the preparation and submission of nuclear information, and the use of INIS products and services.

Assistance and training were provided to a number of national INIS Centres, improving their INIS operational capabilities.

INIS continued its cooperation with ILOs, encouraging new contacts and promotional activities, as well as the inclusion of relevant conference proceedings in the INIS repository.

Nine INIS information letters, covering different aspects of INIS activities, were sent to ILOs.

INIS continued to provide ILOs with weekly Atomindex files on the SFTP server.

OUTREACH AND PROMOTION

INIS participated in World Book and Copyright Day, held on 20 April in the Vienna International Centre and hosted by the IAEA Library. The event provided the opportunity for INIS outreach and promotion. INIS staff demonstrated the INIS repository and provided information on its products and services.

INIS provided bibliometric analysis of research on specific topics to the Physics Section of the IAEA's Department of Nuclear Sciences and Applications.

An article was published on LinkedIn – *Managing Nuclear Information – The Role of INIS*, discussing the benefits of the INIS repository to scientists, researchers, engineers, and others. It also discusses the various roles of INIS in managing nuclear information as a repository for millions of documents, a tool for knowledge management in preserving information for future generations, by providing economic savings of time and money, and politically through international cooperation and information exchange.

A number of presentations regarding various aspects of INIS activities were given by INIS staff at meetings and conferences held in Berlin, Geneva, Karlsruhe, Madeira, Manchester, Munich, Nice, Paris, Rennes, Rome, Trieste and Wroclaw.

Five articles were published by INIS staff: *Impact of Disruptive Technologies on Grey Literature Management. ITLib, 4/2017, Centrum vedecko-technických informácií, Bratislava, Slovakia; Rethinking the Role of Grey Literature in the Fourth Industrial Revolution. 10th Conference on Grey Literature and Repositories: proceedings [online]. Prague: National Library of Technology, 2017; Policy Development for Grey Literature Resources: An Assessment of the Pisa Declaration. The Grey Journal (TGJ), Volume 13, Number 3, Autumn 2017; Managing Diversity in the International Nuclear Information System. The Grey Journal (TGJ), Vol.13, No.1, Spring 2017; and Impact of Current Information Technology Trends on the Future of Grey Literature. 9th Conference on Grey Literature and Repositories: proceedings [online]. Prague: National Library of Technology, 2016 [cit. 2016-12-5].*

Assistance was offered to INIS Liaison Officers to promote INIS within their national boundaries, and promotional materials were sent upon request in support of such activities. INIS provided ILOs with information on relevant meetings and conferences taking place in their countries, encouraging new contacts, promotional activities and the inclusion of relevant input to the INIS repository.

Together with the IAEA Library, INIS conducted training and INIS Repository Search demonstrations for the IAEA Safeguards inspectors training.

120 Tweets were read by 882 followers at @INISsecretariat.

INIS Website

The INIS public website and the INIS Members' area continued to be maintained and updated. Following the IAEA website restructuring, the INIS website was migrated to a new content management system (Drupal) and completely redesigned.

In 2017, there were around 64 575 INIS website visitors viewing over 121 572 pages. Visitor statistics by country are available in Table 3.

INFORMATION TECHNOLOGY DEVELOPMENT PROJECTS

Elasticsearch was implemented in September for the INIS repository search (IRS), replacing Google Search Appliance (GSA). This reduced INIS costs and improved IRS performance, scalability, and maintainability.

An INIS backup and archiving project was implemented to archive full-text documents.

Computer Assisted Indexing (CAI) was improved through two maintenance releases.

Over 12 000 records were harvested from the SCOAP3 Consortium and US DOE PAGES, using the Open Nuclear Information eXchange System (ONIXS), and added to the repository.

The Rule-based Automated Indexing System (RUBAI) was enhanced.

A feasibility study continued testing SKOS-XL/RDF format of the INIS Thesaurus in parallel with the new version of PoolParty Semantic Suite — a software for thesaurus and taxonomy management. The feasibility study is expected to be completed in 2018.

Improvements were made to FIBRE+. FIBRE+ v.1.2 and FIBRE+ v.1.1, with click-once deployment, were made available to Member States.

Use of the INIS Input Management System (IMGM) increased from 2016:

- 79 accounts from 37 INIS Members are registered in the system;
- 372 submissions (12% increase);
- 24 189 records;
- 5134 uploaded full-text files (133% increase).

HUMAN RESOURCES AND BUDGET

At the end of 2017, INIS consisted of 11 staff supported by 5 SDSG staff. SDSG is responsible for NIS IT related matters. Of the 11 INIS staff members, 6 were general service staff, and 5 were professional staff.

INIS Staff

HAKOPOV, Zaven	INIS Coordinator
BOHATSCHEK, Martin	Cataloguing Assistant
DURESA, Negeri Bekele	Nuclear Information Specialist
EPPERSON, Kristina	Senior Documentation Assistant
FEDOROV, Andrey	Digital Preservation Assistant
KANCSAR, Erika	Associate Nuclear Information Officer
KRZNARIĆ, Branko	Senior Digital Preservation Assistant
LIVNJAK, Elvir	Documentation Assistant
SEJMENOVA-GICHEVSKA, Marija	Nuclear Information Associate
VAKULA, Olga	Associate Nuclear Information Officer
WONG, Fui Mien (Serene)	Senior Documentation Assistant

SDSG Staff

ANASTASSOV, Alexandre	Systems Analyst/Programmer (NE)
GARCIA LLOPIS, Jaime pis@iaea.org	Library Systems Analyst
ILIEV, Lubomir	Applications Programmer
MIRONOV, Dmitri	Senior Information Systems Asst.
RAMACHANDRAN, Balu	Systems Analyst/Programmer

Six external subject specialist consultants were recruited to review purchased journal records and assign subject categories and descriptors using the INIS Thesaurus.

Funding through the Regular IAEA Budget for Sub-programme 1.3.4.002 (INIS) totalled € 1 945 683. INIS, the IAEA Library and SDSG make up the Nuclear Information Section, Division of Planning, Information and Knowledge Management, Department of Nuclear Energy at the IAEA.

Programme/Subprogramme/Project	2016 at 2016 prices			2017 at 2016 prices		
	Regular Budget	Extrabudgetary	Unfunded	Regular Budget	Extrabudgetary	Unfunded
1.3.4.001 IAEA library information resources and services	2 575 875	-	-	2 575 875	-	-
1.3.4.002 INIS collection and services	2 005 808	-	-	1 945 683	-	49 934
1.3.4.003 AP support related to nuclear information	65 344	-	-	65 344	-	-
1.3.4 Nuclear Information	4 647 026	-	-	4 586 901	-	49 934

Major Programme 1

Subprogramme 1.3.4 Nuclear Information

Objectives:

- To procure and provide printed and electronic information in the area of nuclear science and technology to the IAEA Secretariat, delegations and other users.
- To facilitate the sustainable sharing of information generated by Member States on the peaceful uses of nuclear energy.

Outcomes	Performance Indicators
<ul style="list-style-type: none"> • Unrestricted and easy access for Member States and the Agency to high quality, relevant and reliable information on the peaceful uses of nuclear science and technology stored in the INIS Collection. 	<ul style="list-style-type: none"> • Number of records available in the INIS database. • Number of INIS Collection web page views.
<ul style="list-style-type: none"> • Unrestricted and easy access to high quality, relevant and reliable information on the peaceful uses of nuclear science and technology for Agency staff members and other users from the IAEA Library collections. 	<ul style="list-style-type: none"> • Annual number of library services used. • Availability and ease of access to information.
<ul style="list-style-type: none"> • Operational International Nuclear Library Network (INLN). 	<ul style="list-style-type: none"> • Number of members participating in the INLN. • Number of nuclear information requests from INLN members.

Programmatic changes and trends: The Nuclear Information System Section (NIS) will continue to gather appropriate nuclear information on the peaceful use of nuclear energy and to make it available to Member States, National Delegations and the IAEA Secretariat through INIS, the IAEA Library and the INLN.

Projects

Title	Main Planned Outputs
<i>1.3.4.001 IAEA Library information resources and services</i>	Accessible, relevant and up to date collection of information resources; acquired print and electronic monographs and serial publications; and operational INLN.
<i>1.3.4.002 INIS Collection and services</i>	Accessible, relevant and up to date collection of INIS bibliographic and full text records; good cooperation with national INIS centres; and high quality thesaurus and accompanying standards.
<i>1.3.4.003 AP support related to nuclear information</i>	Increased number of information resources relevant to nuclear safety available in the IAEA Library and through the INIS Collection's search application.
