Item 7 of the provisional agenda
(GOV/2016/24 and Add.1)

Verification and Monitoring in the Islamic Republic of Iran in light of United Nations Security Council Resolution 2231 (2015)

Report by the Director General

A. Introduction

1. This report of the Director General to the Board of Governors and, in parallel, to the United Nations Security Council (Security Council), is on the Islamic Republic of Iran's (Iran's) implementation of its nuclear-related commitments under the Joint Comprehensive Plan of Action (JCPOA) and on matters related to verification and monitoring in Iran in light of Security Council resolution 2231 (2015). It also provides information on financial matters, and the Agency's consultations and exchanges of information with the Joint Commission, established by the JCPOA.

B. Background

2. On 14 July 2015, China, France, Germany, the Russian Federation, the United Kingdom, the United States of America, with the High Representative of the European Union for Foreign Affairs and Security Policy (E3/EU+3) and Iran agreed on the JCPOA. On 20 July 2015, the Security Council adopted resolution 2231 (2015), in which, inter alia, it requested the Director General to "undertake the necessary verification and monitoring of Iran's nuclear-related commitments for the full duration of those commitments under the JCPOA".¹ In August 2015, the Board of Governors authorized the Director General to implement the necessary verification and monitoring of Iran's nuclear-related

¹ The actions requested of the Director General by the Security Council as contained in resolution 2231 (2015) are set out in GOV/2015/53 and Corr. 1, para. 8.

commitments as set out in the JCPOA, and report accordingly, for the full duration of those commitments in light of Security Council resolution 2231 (2015), subject to the availability of funds and consistent with the Agency's standard safeguards practices. The Board of Governors also authorized the Agency to consult and exchange information with the Joint Commission, as set out in GOV/2015/53 and Corr. 1.

3. The estimated annual cost to the Agency for the implementation of Iran's Additional Protocol and for verifying and monitoring Iran's nuclear-related commitments as set out in the JCPOA is €9.2 million per annum, all of which is to be provided from extrabudgetary funds in 2016. As of 25 May 2016, the total amount available to the Agency for the implementation of the Additional Protocol and for verification and monitoring in relation to the JCPOA was €9.8 million, including the unspent balance of the funds for JPA activities.

4. On 5 May 2016, the Director General met the Vice-President of Iran and President of the Atomic Energy Organization of Iran, HE Ali Akbar Salehi, in Vienna to discuss JCPOA implementation.

C. JCPOA Verification and Monitoring Activities

5. Since 16 January 2016 (JCPOA Implementation Day), the Agency has verified and monitored Iran's implementation of its nuclear-related commitments under the JCPOA,^{2,3} and reports the following for the period since the issuance of the Director General's previous quarterly report.⁴

C.1. Activities Related to Heavy Water and Reprocessing

6. Iran has not pursued the construction of the existing Arak heavy water research reactor (IR-40 Reactor) based on its original design.⁵ Iran has not produced or tested natural uranium pellets, fuel pins or fuel assemblies specifically designed for the support of the IR-40 Reactor as originally designed, and all existing natural uranium pellets and fuel assemblies have remained in storage under continuous Agency monitoring (paras 3 and 10).⁶

7. Iran has continued to inform the Agency about the inventory of heavy water in Iran and the production of heavy water at the Heavy Water Production Plant (HWPP)⁷ and allowed the Agency to monitor the quantities of Iran's heavy water stocks and the amount of heavy water produced at the HWPP (para. 15). On 21 April 2016, the Agency verified the quantity of heavy water shipped out of Iran on 24 February 2016.⁸ On 9 May 2016, the Agency verified that Iran's stock of heavy water had

² GOV/INF/2016/8, para. 6.

³ Note by the Secretariat, 2016/Note 5.

⁴ GOV/2016/8.

⁵ The calandria was removed from the reactor and rendered inoperable during preparation for Implementation Day and has been retained in Iran (GOV/INF/2016/1, Arak heavy water research reactor, paras 3(ii) and 3(iii)).

⁶ The paragraph references in parentheses throughout Sections C and D of this report correspond to the paragraphs of 'Annex I – Nuclear-related measures' of the JCPOA.

⁷ HWPP is a facility for the production of heavy water with a nominal design capacity of 16 tonnes of nuclear-grade heavy water per year.

⁸ GOV/2016/8, footnote 16.

reached 116.7 metric tonnes.⁹ Throughout the reporting period, Iran had no more than 130 metric tonnes of heavy water (para. 14).

8. Iran has not carried out activities related to reprocessing at the Tehran Research Reactor (TRR) and the Molybdenum, Iodine and Xenon Radioisotope Production (MIX) Facility or at any of the other declared facilities (para. 18).

C.2. Activities Related to Enrichment and Fuel

9. At the Fuel Enrichment Plant (FEP) at Natanz, 5060 IR-1 centrifuges have remained installed in 30 cascades in their configurations in the operating units at the time the JCPOA was agreed (para. 27). Iran has not withdrawn any IR-1 centrifuges from those held in storage (see para. 15 below) for the replacement of damaged or failed IR-1 centrifuges installed at FEP (para. 29.1).

10. Iran has continued the enrichment of UF₆ at FEP.¹⁰ Throughout the reporting period, Iran has not enriched uranium above 3.67% U-235 (para. 28).

11. Iran has recovered, under Agency monitoring, some of the enriched uranium that it had stated as recoverable from the process lines at the Enriched UO₂ Powder Plant (EUPP) at Esfahan.¹¹ On 23 and 24 April 2016, the Agency verified that the recovered quantity of uranium enriched up to 3.67% U-235 was 35.7 kg.¹²

12. Between 5 March and 8 May 2016, the Agency verified that Iran downblended 6.1 kg of uranium in the form of UF₆ enriched up to 3.67% U-235 to the level of natural uranium and, between 16 and 24 May 2016, the Agency verified that Iran downblended 5.9 kg of uranium contained in liquid and solid scrap enriched up to 3.67% U-235 to the level of natural uranium.

13. Iran's total enriched uranium stockpile did not exceed 300 kg of UF₆ enriched up to 3.67% U-235 (or the equivalent in different chemical forms) (para. 56).

14. At the Fordow Fuel Enrichment Plant (FFEP), 1044 IR-1 centrifuges have been maintained in six cascades in one wing of the facility (para. 46); Iran has not conducted any uranium enrichment or related research and development (R&D) activities; and there has not been any nuclear material at the plant (para. 45).

⁹ Iran's stock includes nuclear-grade heavy water and its equivalent in different enrichments.

¹⁰ Under the JCPOA, "[f]or 15 years the Natanz enrichment site will be the sole location for all of Iran's uranium enrichment related activities including safeguarded R&D" (para. 72).

¹¹ GOV/2016/8, footnote 19.

¹² 300 kg of UF₆ enriched up to 3.67% contains 202.8 kg of uranium, considering the standard atomic weight of uranium and fluorine.

15. All centrifuges and associated infrastructure in storage have remained under continuous Agency monitoring (paras 29, 47, 48 and 70).¹³ The Agency has continued to have regular access to relevant buildings at Natanz, including all of FEP and the Pilot Fuel Enrichment plant (PFEP), and performed daily access upon Agency request (para. 71).

16. Iran has conducted its enrichment activities in line with its long term enrichment and R&D enrichment plan, as provided to the Agency on 16 January 2016 (para. 52).

17. Iran has not operated any of its declared facilities for the purpose of re-converting fuel plates or scrap into UF₆, nor has it informed the Agency that it has built any new facilities for such a purpose (para. 58).

C.3. Centrifuge Research & Development, Manufacturing and Inventory

18. No enriched uranium has been accumulated through enrichment R&D activities, and Iran's enrichment R&D with and without uranium has been conducted using centrifuges within the limits defined in the JCPOA (paras 32–42).

19. Iran has provided declarations to the Agency, subsequent to those reported in the Director General's previous report,¹⁴ of Iran's production and inventory of centrifuge rotor tubes and bellows and permitted the Agency to verify the items in the inventory (para. 80.1). The Agency has conducted continuous monitoring, including through the use of containment and surveillance measures, and verified that the declared equipment has been used for the production of rotor tubes and bellows to manufacture centrifuges only for the activities specified in the JCPOA (para. 80.2). Iran has not produced any IR-1 centrifuges to replace those that have been damaged or failed (para. 62). All declared rotor tubes, bellows and rotor assemblies have been under continuous monitoring by the Agency, including those rotor tubes and bellows manufactured since Implementation Day (para. 70). On 7 March 2016, the Agency verified Iran's declaration that it had ceased manufacturing rotor tubes.¹⁵ In a letter dated 2 May 2016, Iran informed the Agency of its intention to resume the manufacture of rotor tubes. As of 22 May 2016, the Agency had verified that such manufacturing had not resumed. Verification by the Agency in relation to the manufacturing of rotors and bellows will take place at its next visit. Related technical discussions between the Agency and Iran have taken place.

D. Transparency Measures

20. Iran has continued to permit the Agency to use on-line enrichment monitors and electronic seals which communicate their status within nuclear sites to Agency inspectors, and to facilitate the automated collection of Agency measurement recordings registered by installed measurement devices (para. 67.1). Iran has issued long-term visas to Agency inspectors designated for Iran as requested by the Agency and provided proper working space for the Agency at nuclear sites and facilitated the use

¹³ Iran has removed two IR-1 centrifuge rotors from storage at FEP to a declared centrifuge manufacturing facility that is subject to Agency monitoring, for the purpose of testing such rotors for stable isotope production. As of 8 May 2016, such testing had yet to start.

¹⁴ GOV/2016/8, para. 25.

¹⁵ GOV/2016/8, footnote 20.

of working space at locations near nuclear sites in Iran (para. 67.2). Iran has accepted additional Agency inspectors designated for Iran (para. 67.3).

21. Iran has continued to permit the Agency to monitor - through measures agreed with Iran, including containment and surveillance measures - all uranium ore concentrate (UOC) produced in Iran or obtained from any other source, and reported by Iran to the Agency. Iran also provided the Agency with all information necessary to enable the Agency to verify the production of UOC and the inventory of UOC produced in Iran or obtained from any other source (para. 69).

E. Other Relevant Information

22. Iran continues to provisionally apply the Additional Protocol to its Safeguards Agreement in accordance with Article 17(b) of the Additional Protocol, pending its entry into force. Since the Director General's previous report, the Agency has conducted complementary accesses under the Additional Protocol to sites and other locations in Iran.

23. During this reporting period, the Agency has not attended meetings of the Procurement Working Group of the Joint Commission (JCPOA, Annex IV – Joint Commission, para. 6.4.6).

F. Summary

24. The Agency continues to verify the non-diversion of declared nuclear material at the nuclear facilities and locations outside facilities where nuclear material is customarily used (LOFs) declared by Iran under its Safeguards Agreement. Evaluations regarding the absence of undeclared nuclear material and activities for Iran remained ongoing.

25. Since Implementation Day, the Agency has been verifying and monitoring the implementation by Iran of its nuclear-related commitments under the JCPOA.

26. The Director General will continue to report as appropriate.
