

Malcolm Grimston

Honorary Senior Research Fellow, Centre for Energy Policy and Technology, of the Imperial College in London, Imperial College, United Kingdom

Malcolm Grimston is an academic researcher, writer and media contributor on issues involving electricity markets with a focus on nuclear power. In particular, he focuses on power markets, psychology of risk perception, environmental issues, history of nuclear power and politics.

Mr Grimston has taught chemistry at the University of Cambridge from 1976 to 1979 and has been a professor at the Imperial College since 1995.

He worked for the public information section of the UK Atomic Energy Authority and for the international affairs think tank Chatham House. Since 1994, Mr Grimston has been an elected member of Wandsworth Council in London.

His recent publications include the book “The Paralysis in Energy Decision-Making” (2016).
