

## Mr Rachad Alami

Head, Division of Industrial Applications, Centre National de l'Énergie, des Sciences et des Techniques Nucléaires (CNESTEN)

Rachad Alami has more than 30 years professional experience in the area of nuclear technology. He received a PhD degree in Nuclear Physics from the Université Paris Sud, Orsay, France in 1987. From 1988 to July 2018, he worked as Head of the Division of Industrial Applications at CNESTEN. His research focuses on nuclear applications in cultural heritage and industry, including nucleonic control systems, sealed sources, radioactive tracers and non-destructive testing (NDT).

In addition, Alami is President of the Morocco Radio-Isotope Association (MORIA) and has held the position of Secretary General of COMEND, the Moroccan NDT personnel certification system, since its inception in 1996; he was responsible for implementing its quality management system. He is also an expert with the IAEA and regularly carries out expert missions in many countries.
