

Mr Rabé Sanoussi

Director, Hydrogeology at the Ministry of Water and Sanitation in Niger

Rabé Sanoussi is Director of Hydrogeology at the Ministry of Water and Sanitation in Niger. He graduated from the Abubacar Tafawa Balewa University and the National Water Resource Institute of Nigeria, where he obtained respectively a PGD in Applied Geophysics and an HND in Water Resources Engineering. He is a hydrogeologist, geophysicist and water resource expert for the Nuclear Power Program of Niger.

Sanoussi has more than 30 years' experience in groundwater evaluation and management and established the Automatic Groundwater Monitoring Network in Niger. He is a national coordinator for the IAEA IWAVE project in Niger. He has participated in many conferences and symposia as a panelist and recently delivered a presentation on the challenges and opportunities for sustainable water resources management in Niger at the Regional Conference held at Nouakchott, Mauritania, from 24 to 26 April 2018.
