Le Secrétariat de l'Agence internationale de l'énergie atomique (AIEA) présente ses compliments aux États Membres de l'AIEA et a l'honneur d'appeler leur attention sur le projet de norme de sûreté suivant :

***External Events Excluding Earthquakes in the Design of Nuclear Installations
(DS498)***

Les États Membres et leurs experts ont la possibilité d'examiner et d'évaluer ce projet de norme de sûreté, qui est disponible en ligne à l'adresse suivante :

<https://www.iaea.org/resources/safety-standards/draft-standards-for-ms-comment>

Une version imprimée de ce projet de texte pourra être envoyée sur demande.

Les modifications éventuelles qu'il sera proposé d'apporter au projet de texte à la suite de son examen par les États Membres seront prises en compte pour la mise au point définitive de la norme.

Les États Membres sont priés de bien vouloir communiquer leurs observations sur ce projet de texte en suivant les indications données dans la note explicative ci-jointe.

Le Secrétariat de l'Agence internationale de l'énergie atomique saisit cette occasion pour renouveler aux États Membres de l'AIEA les assurances de sa très haute considération.

20 décembre 2018

Déclaration de la Commission des normes de sûreté

Explanatory Note

External Events Excluding Earthquakes in the Design of Nuclear Installations (DS498)

The draft text for review, entitled *External Events Excluding Earthquakes in the Design of Nuclear Installations*, was prepared as a draft Safety Guide publication to be issued in the IAEA Safety Standards Series and has already been reviewed through consultants' meetings, as well as by the Nuclear Safety Standards Committee (NUSSC) and the Waste Safety Standards Committee (WASSC).

The objective of this draft text, as accepted by the Commission on Safety Standards (CSS), is to provide recommendations and guidance on the design for the protection of nuclear installations from the effects of external events (excluding earthquakes). It is intended to provide recommendations on engineering related matters in order to comply with the applicable safety requirements established in Safety Requirements publications *Safety of Nuclear Power Plants: Design*, *Safety of Research Reactors* and *Safety of Nuclear Fuel Cycle Facilities*. Guidance is offered on methods and procedures for defining an appropriate design envelope for a nuclear installation based on the site hazard evaluations carried out in the site characterization phase and on the specific layout of the plant. These methods and procedures are intended to provide guidance on the design and protection of the structures, systems and components important to safety for the selected design basis external events to ensure the safety of the installation. It also provides guidance on selecting levels of beyond design basis external events in order to check and verify margins and deal with cliff edge effects.

Comments are requested in relation to:

- Relevance and usefulness — Are the stated objectives appropriate, and are they met by the draft text?
- Scope and completeness — Is the stated scope appropriate, and is it adequately covered by the draft text?
- Quality and clarity — Does the guidance in the draft text represent the current consensus among specialists in the field, and are they expressed clearly and coherently?

Comments of an editorial nature will be considered; however, it should be noted that the draft text will be comprehensively edited by the IAEA Secretariat.

Any comments should be made in English, should refer to the relevant paragraph number in the draft text being reviewed, and should propose alternative text where appropriate. Please use the attached Form for Comments to record all comments.

The responsible IAEA officer is Mr A. Altinyollar of the Department of Nuclear Safety and Security, who may be contacted for further information in connection with this subject by telephone at: +43 1 2600 24412 or via email at: A.Altinyollar@iaea.org.

Any comments should be sent through the established official channels to the responsible IAEA officer by **30 April 2019**.

Statement by the Commission on Safety Standards

Publications in the IAEA Safety Standards Series are prepared and reviewed in accordance with a uniform process. To this end, the Commission on Safety Standards (CSS) and five committees with harmonized terms of reference — the Emergency Preparedness and Response Standards Committee (EPRaSC), the Nuclear Safety Standards Committee (NUSSC), the Radiation Safety Standards Committee (RASSC), the Transport Safety Standards Committee (TRANSSC) and the Waste Safety Standards Committee (WASSC) — have been established. The CSS has a special overview role with regard to the IAEA's safety standards and provides advice to the Director General on the IAEA's overall programme with regard to regulatory aspects of safety.

The uniform preparation and review process involves organizing expert group meetings; arranging at different stages of preparation for the internal review of draft texts; submitting the texts to the relevant Committee(s) for review; submitting draft texts to the IAEA's Member States for comment; and submitting the approved final draft of the safety standard¹ for endorsement by the CSS before publication.

The CSS stresses the importance of Member States' comments to the preparation and review process for safety standards. Publications in the IAEA Safety Standards Series not only should be of the requisite quality but also should represent the consensus view of the Member States and should address the issues of importance to the Member States. While the CSS, the Committees and the Secretariat strive to provide safety standards that satisfy these criteria, the review of draft standards by experts in the Member States is an essential stage in obtaining the broadest possible technical consensus and the highest possible quality and relevance.

Member States are also encouraged to provide the IAEA with feedback on their use of the safety standards. The status of safety standards extant and in preparation can be seen on the IAEA's website, where there are also links to electronic files for existing publications, including those in other official languages.² The responsible IAEA officer is Mr Dominique Delattre, Head of the Safety and Security Publications Unit of the Department of Nuclear Safety and Security. He may be contacted for further information in connection with this subject by telephone at: + 43 1 2600 22696 or via email at: D.Delattre@iaea.org.

¹ Safety Guides are published under the authority of the Director General. Safety Fundamentals and Safety Requirements publications require the approval of the Board of Governors, after endorsement by the CSS.
