

## **Abubakar Mohammed Bello**

**Head and Chief Consultant, Clinical and Radiation Oncologist, National Hospital, Abuja, Nigeria**

Dr Bello is a trained and certified Clinical and Radiation Oncologist. As Head of Department of Oncology and Radiotherapy, he has spearheaded the establishment of the first modern radiation therapy department in Nigeria using a CT simulator, using Elekta's Monaco 5.11.1 treatment planning system.

He is part of the African oncologist coalition that has been working to harmonize National Comprehensive Cancer Network (NCCN) guidelines for Sub-Saharan Africa. He is the chair of the prostate, colon, rectal and anal guideline panels and member of the neuroendocrine, pancreatic and adrenal guidelines.

Currently, he is a principal Investigator in 54 gene heritage studies, a gene expression profiling of non-communicable disease in Nigeria. This is the first study of its kind in Sub-Saharan Africa.
