

International Symposium on Trends in  
Radiopharmaceuticals  
Side Event

# Women in Radiopharmaceutical Sciences

***CHALLENGES AND OPPORTUNITIES***

Wednesday, 30 October 2019  
18:00 , Room M2, M Building

# Women in Radiopharmaceutical Sciences

Few women hold leadership positions in radiopharmaceutical sciences worldwide, even though there are career advancement opportunities for women on a scientific, technical and managerial level. This fact reiterates the need to continue efforts to eliminate factors that prevent and delay career advancements for women in science. This event will help in establishing a network for women in radiopharmaceutical sciences that could help career advancement for female professionals in the field.
