

Opportunities for exhibitors during the

Second International Conference on Applications of Radiation Science and Technology (ICARST-2021)

The International Atomic Energy Agency (IAEA) is organizing the **Second International Conference on Applications of Radiation Science and Technology (ICARST-2021)** at the IAEA Headquarters in Vienna, Austria from 19 to 23 April 2021.

The event is aimed at radiation technologists, entrepreneurs or stakeholders involved in applications of radiation technologies, research scientists engaged in nuclear and radiation research, and policy makers and regulators.

Approximately 500 participants from IAEA Member States and international organizations are expected to attend the conference. The IAEA is intending to hold an exhibition for commercial vendors in the fields in conjunction with the conference.

Each company will be provided with, free of charge, an exhibition space of 6m² (3x2m) including one table (80x160cm) and 2 chairs. Alternatively, professional booths with walls can be rented from an outside company.

Companies wishing to take advantage of this opportunity to exhibit are requested to contact the Scientific Secretary of the event via the email address icarst2021@iaea.org and are encouraged to make a voluntary contribution to the IAEA in support of the event. The contribution would be utilized to financially support scientists from developing countries to attend the event or other costs directly related to the organization of the event. An acknowledgement of the voluntary contribution will be made available in the IAEA Conferences app, which will include all conference related information.

In view of space limitations, the selection of exhibitors will be based on a 'first come first served' basis. Therefore, interested parties should send an email to icarst2021@iaea.org before **31 October 2020**.

Further details on logistical arrangements for exhibitors will be sent to them after their replies have pledges have been received.
