

Yury Khomyakov

Chief Scientific Officer of the Proryv Project, Rosatom, Russia

Mr. Yury Khomyakov is a specialist in the field of computational and experimental justification of physics and safety of fast reactors, including the Russian bn-600 and bn-800 reactors.

Currently, he is one of the scientific leaders of the "Proryv" project to create a new technological platform for two-component nuclear power and a closed nuclear fuel cycle in Russia.
