

# Jan Seuntjens

## Professor, McGill University, Canada

Dr. Seuntjens (Ph.D, 1991, University of Ghent, Belgium) is a medical radiation physicist, full professor, James McGill research chair (honor), Director of Medical Physics at McGill University and Senior Scientist at the Research Institute of the McGill University Health Centre.

He is actively involved with numerous committees in the American Association of Physicists in Medicine (AAPM), the IAEA and the International Commission for Radiation Units and Measurements (ICRU).

Seuntjens has co-authored over 270 journal papers, technical reports and books. His involvement with machine learning and AI has been through projects learning from medical images and clinical parameters for the prediction of cancer outcomes in radiation medicine.
