

Chairperson's Summary

We had up to 154 participants at the meeting to discuss How Safety and Security Regulators overcame challenges during the COVID-19 Pandemic.

At today's meeting, seven representatives from Member States authorities – from Argentina, China, Mauritius, Pakistan, South Africa, the United Kingdom and the United States – shared their experience and action plans to keep ensuring nuclear and radiation safety and security during such special circumstances. They also explained how they remained ready to intervene in case of a nuclear or radiological emergency.

The Secretariat also presented its initiatives to support the MS and mentioned the preparation of a technical report on countries' experience in maintaining safety, security and reliable operation during the COVID-19 pandemic.
