

Opportunities for exhibitors during the International Conference on the Safety and Security of Radioactive Sources – Accomplishments and Future Endeavours

The IAEA is organizing the International Conference on the Safety and Security of Radioactive Sources – Accomplishments and Future Endeavours at the IAEA Headquarters in Vienna, Austria from 20 to 24 June 2022.

The purpose of the conference is to foster the exchange of experiences and anticipated future developments related to establishing and maintaining a high level of safety and security of radioactive sources throughout their life cycle.

Approximately 600 to 800 participants from IAEA Member States and international organizations are expected to attend the Conference.

It is planned to hold an exhibition in conjunction with the conference. In the exhibition IAEA Member States, international organizations, academic institutions, non-governmental organizations and vendors of technology will highlight the latest developments in their areas related to safety and security of radioactive sources.

Each exhibitor will have a dedicated space free of charge, of up to 6m² (3x2m).

Companies wishing to take advantage of this opportunity to exhibit are encouraged to make a voluntary contribution to the IAEA in support of the conference. The contribution will be used for the costs directly related to the organization of the conference. An acknowledgement of the voluntary contribution would be made in the distributed conference programme booklet given to participants upon registration.

In view of space limitations, the selection of exhibitors will be based on a 'first come first served' basis. Therefore, interested parties should contact the Scientific Secretariat by e-mail CN-295@iaea.org before **11 February 2022**.
