ABOUT THE SCHOOL

The School of Radiation Emergency Management is an intensive course aiming at strengthening participants' ability to develop, implement and manage sustainable emergency preparedness and response (EPR) programmes. The course, based on IAEA safety standards, technical guidelines, tools and training material, helps IAEA Member States strengthen their preparedness for a nuclear or radiological emergency.

WHO? Qualified professionals from organizations involved in the management, coordination and implementation of EPR for nuclear or radiological emergencies.

WHAT? Two to three weeks of lectures, training sessions, practical exercises and field visits.

WHERE? The School is hosted by a Member State, often in an IAEA EPR Capacity Building Centre.

Member States desiring information on the School - contact the IAEA Incident and Emergency Centre at iec-information@iaea.org.
