

Second International Conference on Applications of Radiation Science and Technology (ICARST-2022)

OPPORTUNITIES FOR EXHIBITORS

The International Atomic Energy Agency (IAEA) is organizing an International Conference at the IAEA Headquarters in Vienna, Austria from August 2022 with the possibility of remote connection.

Approximately 600 participants from IAEA Member States and international organizations are expected to attend the conference. In conjunction with the conference, there are opportunities for commercial vendors to exhibit/display their products and a limited amount of space will be available for that purpose.

Each company will have, free of charge, an exhibition space of 6m² (3x2m) including one table (80x160cm) and 2 chairs. Alternatively, professional booths with walls can be rented from an outside company.

Companies wishing to take advantage of this opportunity to exhibit are encouraged to make a voluntary contribution to the IAEA in support of the conference. The contribution will be used for the costs directly related to the organization of the conference. An acknowledgement of the voluntary contribution would be made in the IAEA conference and meetings app where all conference related information will be available and which will also serve as virtual platform for the event.

In view of space limitations, the selection of exhibitors will be based on a 'first come first served' basis. Therefore, interested parties should contact the Scientific Secretariat by e-mail icarst2022@iaea.org before **31 May 2022**.

Further details on logistical arrangements for the exhibition will be sent to the exhibitors after their pledges have been received.

Should the event be turned into a fully virtual event, exhibitors will still have the opportunity to promote their products by providing a link to their website or virtual exhibition platform which will be made available on the IAEA conference and meetings app.
