

**European Union**

**EU Statement at  
General Debate**

**66<sup>th</sup> session of the General Conference  
International Atomic Energy**

**Vienna, 26 September 2022**

Mr. President,

I have the honour to speak on behalf of the European Union. The following countries align themselves with this statement: North Macedonia\*, Montenegro\*, Albania\*, Ukraine\*, the Republic of Moldova\*, Bosnia and Herzegovina\*, Georgia, Iceland<sup>†</sup> and San Marino.

Let me congratulate you, Mr. President, on your election and thank the IAEA Director General and the Secretariat for their excellent work over the past year.

The European Union attaches great importance to the IAEA's technical, independent and impartial work across its mandate.

We are meeting in unprecedented circumstances. The European Union condemns, in the strongest possible terms, the Russian Federation's unprovoked and unjustified aggression against Ukraine which is a gross violation of international law, notably the UN Charter, and severely undermines European and global security and stability.

Russia's actions pose serious and direct threats to nuclear safety and security and the Agency's safeguards verification activities in Ukraine, as highlighted in the Board resolutions adopted in March and September. We are deeply concerned that each of the seven

<sup>†</sup> Iceland is a member of the EFTA and of the European Economic Area.

indispensable pillars outlined by the IAEA Director General, has been compromised as a result of the Russian aggression. As stated by the Director General, a nuclear accident must not be added to the tragedy of this war.

The EU strongly supports the Agency's work to assist Ukraine, notably the IAEA Support and Assistance Mission to Zaporizhzhia (ISAMZ) and the Agency's continued presence at the facility. We also support the Director General's proposal to establish a nuclear safety and security protection zone around the Zaporizhzhia Nuclear Power Plant (ZNPP), the modalities of which would still need to be agreed. We emphasize there is only one sustainable solution: The Russian Federation must stop its illegal war of aggression against Ukraine, unconditionally withdraw all its armed forces and military equipment from the entire territory of Ukraine, notably from the ZNPP, and fully respect Ukraine's territorial integrity, sovereignty and independence within its internationally recognised borders.

The EU reaffirms its resolute commitment to and continued support for the full and effective implementation of the Joint Comprehensive Plan of Action (JCPOA). The EU is increasingly concerned at Iran's continued actions inconsistent with the JCPOA and with severe, and in the case of R&D activities, irreversible proliferation implications. Some of these actions do not have any plausible civilian justification. The EU strongly urges Iran to return without delay to full JCPOA implementation, including all transparency measures. The EU supports the intensive diplomatic efforts within the JCPOA Joint Commission and the contacts of the EU High Representative as JCPOA Coordinator with all relevant partners to achieve a return to the JCPOA by the United States and the resumption of full implementation of all JCPOA commitments by the United States and Iran. The EU Member States regret that Iran has chosen not to seize the diplomatic opportunity and call on Iran to accept it so that the JCPOA would be fully restored. We wish to underscore that the JCPOA negotiation is separate from Iran's legally binding obligations under the NPT, which are essential to the global non-proliferation regime. The EU urges Iran to cooperate in full

with the IAEA without any further delay or conditionality to resolve all pending safeguards issues, in accordance with its legally binding obligations under its NPT Comprehensive Safeguards Agreement.

The EU condemns the DPRK's continued engagement in nuclear and ballistic missile activities which are a matter of grave concern. It is highly regrettable that the DPRK has not taken concrete, verified action towards denuclearization of the Korean Peninsula. We urge the DPRK to comply with its obligations under multiple UN Security Council Resolutions, to refrain from nuclear tests and ballistic missile launches, and to engage in a meaningful dialogue with all relevant parties to build a basis for sustainable peace and security. We also urge the DPRK to return to negotiations and take immediate and concrete steps towards abandoning all nuclear weapons, ballistic missiles and related programmes in a complete, verifiable and irreversible manner.

Mr. President,

The EU regrets that the 10<sup>th</sup> Review Conference of the Nuclear Non-Proliferation Treaty (NPT) could not achieve consensus on a final outcome document because of the Russian Federation blocking consensus. We will spare no efforts to continue promoting the full and effective implementation of the NPT as well as its universalisation, and will build upon the substantial discussions held tirelessly over the course of the 10<sup>th</sup> Review Conference to prepare for the new review cycle. The NPT remains the cornerstone of the global nuclear non-proliferation regime, the essential foundation for the pursuit of nuclear disarmament in accordance with Article VI of the NPT and an important element in the development of nuclear energy applications for peaceful purposes in accordance with Article IV of the NPT. Its legally binding obligations and past commitments remain valid. The EU reaffirms its full support for the establishment of a zone free of nuclear and all other weapons of mass destruction and their delivery systems in the Middle East, as agreed at the 1995 NPT Review Conference. The EU also affirms its full support for the decision to establish a working group to strengthen the review cycle.

The EU supports the strengthening of the IAEA safeguards system and remains of the view that Comprehensive Safeguards Agreements, together with the Additional Protocol, constitute the current verification standard under the NPT. We call for their universalisation without delay. The EU also urges all States, which have not yet done so, to amend their Small Quantities Protocols or apply the Comprehensive Safeguards Agreement in full, especially those States that are already building a nuclear power plant or a research reactor.

The EU and its Member States attach utmost importance to nuclear safety, and its continuous improvement. Over the past decades, we have established and further developed an advanced, legally-binding nuclear safety framework applicable in all EU Member States. We also provide financial and human resources to help improve nuclear safety in countries outside the EU, including through the European Instrument for International Nuclear Safety Cooperation (INSC), with a budget of €300 million.

Furthermore, the EU stresses the need to continue strengthening nuclear security worldwide in order to prevent nuclear terrorism and facilitate peaceful uses of nuclear technology. We encourage all Member States to promote a strong nuclear safety and security culture and continuously implement the highest possible nuclear safety and radiation protection standards. We recognise the IAEA's central role in facilitating international cooperation and providing technical assistance to Member States.

We reaffirm our strong political commitment to international nuclear safety and security conventions,<sup>1</sup> support their implementation and call upon all States to join them. We stress the need to consider new legally-binding international rules specifically prohibiting armed attacks against any nuclear installation devoted to peaceful purposes.

<sup>1</sup> Such as the Convention on Nuclear Security (CNS), the Joint Convention on the Safety of Spent Fuel and Radioactive Waste Management (JC), and the Amended Convention on the Physical Protection of Nuclear Material (A/CPPNM and the International Convention for the Suppression of Acts of Nuclear Terrorism (ICSANT)

Mr. President,

The EU and its Member States reaffirm their longstanding commitment to and strong support for the IAEA's Technical Cooperation Programme and support the Agency's work in the peaceful uses of nuclear technology in order to reach the Sustainable Development Goals and the Paris Agreement commitments including in the context of COP27. We acknowledge that Member States pursue different approaches to ensure energy security at affordable cost and that all countries have the sovereign right to decide whether or not to include nuclear power as part of their own energy mix to collectively achieve the 2030 climate target and the Paris Agreement commitments. The EU acknowledges the role played by nuclear technologies in relation to the global efforts to limit climate change and mitigate its negative effects. The EU also welcomes the new "Rays of Hope" initiative and the organisation of this year's Scientific Forum on this topic.

We welcome the strong commitment to gender equality and encourage the Secretariat to continue its efforts to achieve gender parity and mainstream gender in its programmes and projects. The EU is proud to be the largest donor to the IAEA's Marie Skłodowska-Curie Fellowship Programme.

We remain among the IAEA's largest donors and expect efficient and effective programme delivery. Given the importance of the IAEA's work, we hope the Member States will do their utmost to ensure sustainable funding for the IAEA's key activities.

Thank you, Mr. President.
