

## Tarek Shouman

**Professor of Radiation Oncology, National Cancer Institute, Cairo University, Cairo, Egypt**

Professor Tarek Shouma has worked in the field of oncology, specifically radiation therapy, for 36 years. Aside from treatment of cancer patients, he plays an integral role in the education of younger staff and supervision of MSc and PhD degrees for multiple students.

Professor Shouma chaired the radiation oncology department of the largest comprehensive cancer center in Egypt from 2011 to 2017. He has helped in the initiation and development of several cancer centers in Egypt.

He has cooperated with the IAEA as a focal point for radiotherapy projects in Egypt. In the National Cancer Institute (NCI), he has continually cooperated with the IAEA in training staff from different Member States and in several Coordinated Research Projects. He shares his experience with the IAEA as an expert to different Member States in Africa, developing national cancer control programmes and training courses.
