

## **François Kabuya Kazadi**

**Head, Department of Radiation Safety and Assessment, Congo Atomic Energy Commission (CGEA), Democratic Republic of Congo**

M. Kazadi graduated in Radiation Physics and specialised in Radiation Protection and Environmental Protection at the University of Surrey in England. He spent most of his career working in nuclear safety and radiation protection covering both environmental and medical aspects.

During his academic activities, he worked on Hadrontherapy as a new cancer treatment technique. This allows him to have a broad understanding of cancer treatment approaches.

He has published several scientific papers in this field and worked as Expert for IAEA both at regional and international levels.

Currently, M. Kazadi is one of the project Counterpart for COD6017. He has been project member since 2004.
