Guidelines for exhibitions organized by Member States on the margins of the General Conference

Given the limited number of exhibition spaces available within the Vienna International Centre (VIC) during the General Conference (GC), the present guidelines are intended to streamline submission, processing and approval of exhibition requests received from Member States.

Exhibition proposals have to be submitted or approved by the relevant national authority or Permanent Mission of the concerned Member State to the IAEA.

Exhibition requests will be processed taking into account the following:

a. Relevance to the activities of the Agency; and

b. The compatibility with the objectives and functions, aims and purposes of the Agency, in both content and presentation.

• Exhibition space assignment requests are processed on a first-come, first-served basis and rotational basis, as is the Agency practice. Therefore, no specific spot can be automatically reserved by the same Member State every year.

• The maximum space assigned is **12 square meters**.

• Exhibitors must respect the height restriction of the booth constructions which is set to **maximum 2.5 meters** (250 cm including all elements).

• **Friday, 31 May 2024:** The completed ‘Exhibition Request Form’ needs to be submitted to the Conference Services Section (CSS/MTC).

• **Monday, 15 July 2024:** Exhibitors will be notified of the location of their exhibit.

• To process a request, please ensure all required information in the ‘Exhibition Request Form’ is provided and is submitted within the given deadline.

• The ‘Greening’ initiative will apply to the 68th General Conference. Exhibitors are expected to take part in this sustainable initiative and choose environmentally friendly options when planning their participation. More information on the required criteria and compliance will be shared once exhibitions are approved.

• Exhibits must have safe and secure display structures, and exhibitors should use standard electrical equipment as well as the services of a professional electrician.

• **By Monday, 9 September 2024:**
  Shipments containing exhibition materials delivered by transport companies to arrive at the IAEA receiving area. CSS/MTC will provide information, via email, on shipment issues and on the removal of packing material from the VIC.

• **By Monday, 9 September 2024:**
  Names of stand builders and exhibition support staff that require access for the set-up of exhibition booths to be announced to the contact point for GC exhibitions (GC.Exhibitions@iaea.org).
