Safeguards in 2024
Implementing effective IAEA safeguards for nuclear non-proliferation

- Verify and monitor Iran's nuclear-related commitments under the JCPOA
- Foster a respectful, inclusive and diverse workplace
- Encourage and assist States to amend or rescind their original Small Quantities Protocols and to bring into force Additional Protocols
- Implement effective safeguards and draw soundly based safeguards conclusions for all States
- Offer tailored capacity building to States, while enhancing partnerships in support of IAEA verification capabilities
- Further develop and align safeguards approaches, processes, tools and methodologies for the implementation of safeguards
- Maintain enhanced readiness to return to the DPRK if and when requested
