

## **Mr. Brian Wade**

### **Head of Science and Solutions, Anglo-American**

Mr. Brian Wade is the Head of Science and Solutions at the Anglo-American. He leverages his extensive experience from farm to academia to industry to innovate sustainable agricultural solutions. He has partnered across multiple organization around the world to implement efficiency improvements in crop production systems. His mental model is to understand the 'trilemma' of crop, soil, and environment constraints. By releasing the constraints, the farmers can increase the value created and achieve better economic and environmental outcomes.
