Ms. Marie-Yasmine Dechraoui Bottein is a professor at the Université Côte d'Azur in Nice, where she is affiliated with the Ecology and Conservation Science for Sustainable Seas (ECOSEAS) laboratory. She brings extensive experience in research, capacity building, and knowledge transfer, focusing on harmful algal blooms (HABs), biotoxins, and marine science. Her career spans 11 years with NOAA's Coastal Environmental Health and Biomolecular Research branch in the USA and 7 years with the IAEA Marine Environment Laboratories in Monaco. Professor Bottein has also provided expertise to the FAO, the Intergovernmental Oceanographic Commission of UNESCO, and the French Agency for Food, Environmental, and Occupational Health & Safety.
