

International Nuclear Library Network (INLN)

Forum for nuclear libraries, information centres and other relevant, nuclear organizations. Coordinated by the IAEA Library.

Established in 2005 with the aim to promote information exchange, cooperation, resource sharing and learning among nuclear information centres worldwide.

The network counts 58 members from 39 IAEA Member States.

Services which the participating members provide include; research support, interlibrary loan, document delivery, nuclear information and knowledge management guidance.
