

# General Conference

Sixth regular session

Agenda item 17  
(GC(VI)/207)

## LONG-TERM PLANNING

Resolution adopted during the 71st plenary meeting on 26 September 1962

### PROGRAMME OF TECHNICAL ASSISTANCE TO THE DEVELOPING COUNTRIES

The General Conference,

- (a) Noting with interest and appreciation the proposal to put in hand a programme of creating various scientific installations for certain specific purposes in the developing countries, made by the delegates of Bulgaria, the Byelorussian Soviet Socialist Republic, the Czechoslovak Socialist Republic, Hungary, Poland, Romania, the Ukrainian Soviet Socialist Republic and the Union of Soviet Socialist Republics,
- (b) Noting also that these delegations declare that their Governments would be ready to contribute one-third of the resources required for the implementation of such a programme,
- (c) Recognizing that the International Atomic Energy Agency has begun to elaborate a long-term programme to cover all its activities, and
- (d) Recognizing also that such a long-term programme must take into account the requirements of the developing countries for training opportunities, and for assistance in the carrying out of the most modern techniques of isotope science in medicine, agriculture and industry, in order that the Agency's efforts fit in with these countries' desires and aspirations as expressed in their respective national plans, or in any intergovernmental or regional plans,

Requests the Board of Governors and the Director General to make a most careful study of the proposal contained in document GC(VI)/COM.1/67/Rev.1, in order to determine how this and other offers of a like nature may best be introduced into the overall long-term plan now in the process of elaboration, as soon as the necessary detailed information regarding such offers has been made available.
