The Supply Agreement

Amendments

On 24 July 1975 the Agency and the Governments of Romania and the United States of America amended by letter of agreement Section 1 of the Supply Agreement, concluded in connection with the Agency's assistance to Romania for the establishment of a research reactor project and reproduced in document INFCIRC/206, part 1, to provide for the transfer to Romania of about 42 000 grams (instead of about 34 350 grams) of uranium enriched to approximately 93 per cent in the isotope uranium-235 by the United States Energy Research and Development Administration instead of by the former United States Atomic Energy Commission.
