COMMUNICATION RECEIVED FROM THE GOVERNMENT OF THE FEDERAL REPUBLIC OF GERMANY CONCERNING ITS POLICIES REGARDING THE MANAGEMENT OF PLUTONIUM

Statements on the Management of Plutonium and of Highly Enriched Uranium

1. The Director General has received a note verbale dated 7 November 2001 from the Permanent Mission of the Federal Republic of Germany to the IAEA in the enclosures of which the Government of the Federal Republic of Germany, in keeping with its commitment under the Guidelines for the Management of Plutonium (contained in INFCIRC/549 of 16 March 1998 and hereinafter referred to as the "Guidelines") and with reference to the statement on the policies which it has decided to apply to the management of plutonium (contained in INFCIRC/549/Add.2), has made available the data on the plutonium inventory on German territory as of 31 December 2000. The Government of the Federal Republic of Germany has conveyed in its note verbale that "Regarding any material that has been shipped abroad, especially for reprocessing, Germany would like to point out that the data on such material are not available at the German side. This should be taken into consideration whenever these data are used for statistical purposes. All nuclear materials within the states of the EU are property of the European Union, represented by the EURATOM Supply Agency".

2. The Government of the Federal Republic of Germany in the enclosures of its note verbale of 7 November 2001 has also made available its inventory of highly enriched uranium noting that, "HEU is being used in some research reactors. The HEU in storage consists mainly of spent fuel of the pebble-bed high temperature reactor in storage casks. Smaller amounts in bulk form are handled in various research facilities. As there is no activity in Germany on high enrichment of uranium, there is no HEU inventory in facilities/locations engaged in enrichment activities".

3. In the light of the request expressed by the Federal Republic of Germany in its note verbale of 1 December 1997 concerning its policies regarding the management of plutonium (INFCIRC/549 of 16 March 1998) the texts of the enclosures of the note verbale of 7 November 2001 are attached for the information of all Member States.

ANNEX 1

Germany

ANNUAL FIGURES FOR HOLDINGS OF CIVIL UNIRRADIATED PLUTONIUM

<u>Totals (in metric tons)</u>	as of 31 Dec 2000 (Previous year's figures in brackets)	
1. Unirradiated separated plutonium in Product stores at reprocessing plants.	n.a.	(n.a.)
2. Unirradiated separated plutonium in the course of manufacture or fabrication and plutonium contained in unirradiated semi-fabricated or unfinished products at fuel or other fabricating plants or elsewhere.	0,44	(0,58)
3. Plutonium contained in unirradiated MOX fuel or other fabricated products at reactor sites or elsewhere.	7,58*	(5,48)
4. Unirradiated separated plutonium held elsewhere.	1,10	(1,13)

Note:

(i) Plutonium included in lines 1–4 above belonging to foreign bodies.

**

(ii) Plutonium in any of the forms in lines 1–4 above held in locations in other countries and therefore not included above.

**

(iii) Plutonium included in lines 1–4 above which is in international shipment prior to its arrival in the recipient State.

* Cleaning of former fabrication facility for complete decommissioning.

** Data on material outside Germany or on “foreign” material in Germany are not available.

All material is property of the EU.

Germany**ESTIMATED AMOUNTS OF PLUTONIUM CONTAINED IN SPENT CIVIL REACTOR FUEL**

<u>Totals (in metric tons)</u>	as of 31 Dec 2000	
	(Previous year's figures in brackets)	
1. Plutonium contained in spent fuel at civil reactor sites.	41,24	(36,75.)
2. Plutonium contained in spent fuel at reprocessing plants.	n.a.	n.a..
3. Plutonium contained in spent fuel held elsewhere.	5,47	(5,90)

Note:

- i) The treatment of material sent for direct disposal will need further consideration when specific plans for direct disposal have concrete form.
- ii) Definitions:
 - Line 1: covers estimated amounts of plutonium contained in fuel discharged from civil reactors;
 - Line 2: covers estimated amounts of plutonium contained in fuel received at reprocessing plants but not yet reprocessed.
- iii) Plutonium contained in spent fuel sent for reprocessing and held in locations in other countries.

**

 (This plutonium may be in the form of line 2 above or in any of the forms of lines 1-3 of Annex B.)

Germany**ESTIMATED AMOUNTS OF HIGHLY ENRICHED URANIUM**Totals (in metric tons)

as of 31 Dec 2000

1.	HEU contained in Research Reactors.	0,05
2.	HEU (irradiated) contained in storages	0,53
3.	HEU in bulk form	0,06

All material is property of the EU.
