

Anura Kurpad

St. John's Medical College, Bangalore, India

Anura Kurpad is the Head of the IAEA Collaborating Centre on Stable Isotopes in Nutrition as well as a Margdarshi Fellow of the India Alliance of Wellcome Trust and Department of Biotechnology. His expertise lies in the use of stable isotopes to evaluate nutrient requirements, the adaptation to low nutrient intake, the bioavailability of nutrients, and the outcomes of nutritional interventions. His work with stable isotopic evaluations of essential amino acid requirements formed the primary evidence for the recent WHO/FAO/ONU recommendations for human protein and amino acid requirements.

Anura Kurpad is also a Member and Chair of several committees in the Indian Council of Medical Research, the Food Safety and Standards Association of India, as well as the Department of Biotechnology.
